

ACCEPTED

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTERED
UNDER NO. 6811-21

The presence of algae in outdoor swimming pools is objectionable because of the color, cloudiness, odor and increased chlorine demand of the water. The use of C-10 Algaecide will help maintain water in a clean, sanitary condition.

C-10 Algaecide is compatible with the usual water treatment chemicals. By controlling algae growth with C-10, the chlorine demand of the pool may be reduced significantly.

~~It is not~~, when used as directed.

U.S.D.A. Reg. No. 6811-21

IT IS NON-TOXIC TO HUMANS IN RECOMMENDED POOL CONCENTRATIONS.

NET CONTENTS: _____ GALS.

C-10 ALGAECIDE

Active ingredients:
n-alkyl (C₁₄, C₁₂, C₁₆) dimethyl benzyl ammonium chlorides 10%
Inert ingredients:
Water and ethanol 90%

CAUTION: HARMFUL IF SWALLOWED. KEEP OUT OF REACH OF CHILDREN.

C-10 Algaecide ~~concentrate~~ may cause skin irritation or damage to the eyes. Avoid contact with skin and eyes. In case of contact, flush immediately with plenty of water. For eyes, get medical attention. Avoid contamination of food.

If algae growth is ^{C10} heavy, add 1 gallon C-10 for each 20,000 gallons of water to kill and control those algal species most commonly found in swimming pools.

When existing growth is dead and algae have withered, clean the pool, draining and refilling if necessary, then add 1 gallon C-10 per 50,000 gallons of water.

If algae growth is absent, use 1 gallon C-10 for each 50,000 gallons water. Add ~~1~~ ^{1/2} gallon C-10 per 50,000 gallons water every 5 to 7 days to maintain between 1 and 5 parts per million of active ingredient. See representative for test kit.
