Directions for Use
GENERAL CLASSIFICATION

This classification of Federal Law to use this product in a manner inconsistent with its labeling.

LONZA FORMULATION 68-16 is a heavy-duty disinfectant and sanitizer. It is effective against a wide range of microorganisms, including bacteria, viruses, and fungi. It is used for the disinfection of surfaces, equipment, and linens in hospitals, institutions, and industrial settings.

Apply LONZA FORMULATION 68-16 to walls, floors and linens. For general disinfection, use 1 oz per gallon of water. For heavy-duty disinfection, use 2 oz per gallon of water. For sanitization, use 1 oz per gallon of water. Always use as directed.

Disinfection: For routine disinfection, use 1 oz per gallon of water. For heavy-duty disinfection, use 2 oz per gallon of water. For sanitization, use 1 oz per gallon of water. Always use as directed.

Sanitizing: To sanitize porous or non-porous hard and contact surfaces, add 1 oz per gallon of water. Treated surfaces must remain wet for 10 minutes.

For hospitals, nursing homes, schools, institutions and industry, add 1 oz per gallon of water. The broad spectrum activity of LONZA FORMULATION 68-16 has been evaluated in the presence of 5% serum and found to be effective against the following organisms by the AOAC fungicide test:

AOAC Fungicide Test: LONZA FORMULATION 68-16 is an effective fungicide against phyto-mentagrophytes (the athlete's foot fungus) when used on surfaces in areas such as locker rooms, dressing rooms, shower and bath areas, exercise rooms, etc.

Mold and Mildew Control: At 1 oz per gallon, LONZA FORMULATION 68-16 will effectively inhibit the growth of mold and mildew. This is caused by a fungus which grows on walls, ceilings, and floors, as indicated by the presence of water. Apply to dry or surface and repeat when new growth occurs.

Virucide Performance: At 1 oz per gallon, LONZA FORMULATION 68-16 will effectively inhibit the presence of the serum and found to be effective against the following viruses: Simples, a member of the virus family that causes infectious mononucleosis, and a representative of the polyoma virus family. Also, it is effective against the strain of influenza virus which is the most common cause of influenza.

Sanitizing-Non Food Contact Surfaces (such as walls, floors, tables, etc.): Use 1 oz per gallon of water. LONZA FORMULATION 68-16 will effectively sanitize water. It is effective against a wide range of microorganisms, including bacteria, viruses, and fungi. It is used for the disinfection of surfaces, equipment, and linens in hospitals, institutions, and industrial settings.
