RECIRCULATING
COOLING WATER SYSTEMS

Glybrom RW - 93.5 aids in the control of bacterial, fungal and algal slimes in recirculating cooling water systems servicing heat exchangers, evaporative condensers and other equipment requiring cooling. It is also effective in controlling various microbiological growth formations in influent systems such as lagoons or flow-through filter systems, industrial wet scrubber systems and brewery pasteurizers. This product may be added to the systems either continuously or intermittently or as needed. The frequency of feeding and duration of the treatment will depend upon the severity of the problem.

Badly fouled systems must be cleaned before treatment is begun.

STORAGE AND DISPOSAL

STORAGE. Keep container tightly closed. Store in a dry place. Do not store at elevated temperatures.

DISPOSAL. Do not contaminate water, food or feed by storage or disposal. Pesticide wastes are acutely hazardous and/or toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of federal law. If these wastes cannot be disposed of by use according to the label instructions, contact your state pesticide or environmental control agent or the hazardous waste representative at the nearest EPA regional office for guidance.

METAL AND PLASTIC CONTAINERS. Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate or burn, if allowed by State and local authorities. If burned, stay out of smoke.

FIBER DRUMS AND LINERS. Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Then dispose of liner and drum in a sanitary landfill or incinerate if allowed by state and local authorities. Do not reuse empty drum or liner.
