Cross-contamination is of major housekeeping concern **Lonza Formulation S-38F** has been formulated to aid in the reduction of cross-contamination not only in hospitals but in schools institutions and industry

Regular effective cleaning and sanitizing of equipment utensils and work or dining surfaces which could harbor food poisoning microorganisms minimizes the probability of contaminating food during preparation storage or service Effective cleaning will remove soil and prevent the accumulation of food residues which may decompose or support the rapid development of food poisoning organisms or toxins Application of effective sanitizing procedures reduces the number of those food poisoning organisms which may be present on equipment and utensils after cleaning and reduces the potential for the transfer either directly through tableware such as glasses cups and flatware or indirectly through food

To prevent cross-contamination kitchenware and food-contact surfaces of equipment must be washed rinsed with potable water and sanitized after each use and following any interruption of operation during which time contamination may have occurred

Where equipment and utensils are used for the preparation of foods on a continuous or production-line basis utensils and the food contact surfaces of equipment must be washed rinsed with potable water and sanitized at intervals throughout the day on a schedule based on food temperature type of food and amount of food particle accumulation

Articles that can be immersed in solution must remain in solution for 60 seconds Articles or surfaces too large for immersing must be thoroughly wetted or flooded by rinsing spraying or swabbing Allow all sanitized surfaces to drain thoroughly [and air dry]

**Lonza Formulation S-38F** is a sanitizer for hard porous and nonporous non-food contact surfaces at 1 256 dilution [150 ppm active] [½ oz per gallon of water] according to the method for Sanitizers – Non-food Contact surfaces modified in the presence of 300 ppm hard water plus 5% organic serum in 60 seconds against
