This algicide is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of most common green (Chlorella) and blue green (Phormidium) algae and being non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of this algicide tends to stabilize the total chemical treatment system.

This algicide is compatible with most chemicals normally used in swimming pool maintenance.

This algicide is economical, efficient, stable.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For best results: test and adjust water balance before use, chlorinate and clarify pool water as required, shock treat pool water at least weekly, keep filtration systems clean and back-flush regularly. Call your local health department for assistance with any issue relating to good pool operating practices.

**APPLICATION:** For all applications, apply equal amounts of Bioguard Swimming Pool Algicide 28-10 to pool water along pool edges around the circumference of the pool while filter pump is running. Run pump for at least 6 hours after application. Wait at least 15 minutes after application before entering pool.

**INITIAL APPLICATION:** When filling pool at beginning of season add one gallon of Bioguard Swimming Pool Algicide 28-10 per 25,000 gallons water (25.6 oz of Bioguard Swimming Pool Algicide 28-10 per 5,000 gallons water) (2 ppm active ingredient).

**VISIBLE ALGAE:** If algae are visible, brush surfaces and then add one gallon of Bioguard Swimming Pool Algicide 28-10 per 25,000 gallons water (25.6 oz of Bioguard Swimming Pool Algicide 28-10 per 5,000 gallons water) (2 ppm active ingredient). Vacuum pool and remove dead algae after 24 hours. Repeat treatment as necessary if algae are still present.

**MAINTENANCE DOSE:** Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algae growth is difficult to remove. When pool is free of visible algae, add one quart of Bioguard Swimming Pool Algicide 28-10 per 50,000 gallons water (3.2 oz of Bioguard Swimming Pool Algicide 28-10 per 5,000 gallons water) (0.4 ppm active ingredient) every week. For very hot weather or heavy bathing load, use this dosage every 5 days.

**BOOSTER DOSE:** After heavy rains or severe storms, add one quart of Bioguard Swimming Pool Algicide 28-10 per 50,000 gallons water (3.2 oz of Bioguard Swimming Pool Algicide 28-10 per 5,000 gallons water) (0.4 ppm active ingredient).

**TO DETERMINE POOL CAPACITY**

**Rectangular Pools** - Length times width times average depth (in feet) times 7.5 equals gallons.

**Round and Oval Pools** - Average diameter times average diameter times average depth (in feet) times 5.9 equals gallons.
