

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS**

CAUTION

Causes eye irritation. Avoid contact with eyes, skin, or clothing. Avoid contact with foods. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

Store only in tightly closed, original container in a secure area inaccessible to children and away from food or feed.

Do not reuse empty container. Rinse thoroughly before discarding in trash.

DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

An effective disinfectant, cleaner and deodorant for hospitals, homes, motels, hotels, schools, nursing homes, nurseries, factories, business and industrial buildings, restaurants, food plants, boats, campers and automobile and airplane interiors.

Cleans and deodorizes porcelain, tiling, grouting, stainless steel, enameled surfaces, woodwork, formica, leather, vinyl, and plastic.

Use it on counter tops, stove tops, exhaust fans, washable walls, sinks, shower stalls, bed frames, vinyl, leather, and plastic upholstery.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

CLEANING AND DEODORIZING: Hold sprayer nozzle 6 to 8 inches from the surface to be cleaned. Thoroughly wet the area. Allow the solution to penetrate for about one minute and then wipe away the soil with a clean cloth or sponge. The wiping cloth may be pre-dampened with water or with this product.

2. **FOR DISINFECTION:** Before disinfecting, pre-clean the surface as in Step 1 above. Then, apply enough fresh solution to thoroughly wet the surface. Allow the disinfecting solution to contact surfaces for 10 minutes before wiping or rinsing the treatment from the surfaces.
3. **FOR MILDEW:** Follow directions for disinfection. Repeat treatment every two weeks or when mildew growth first reappears.

NOTE: This product may be used on food contact surfaces, but surfaces must be thoroughly rinsed with potable water before they are permitted to re-contact food.
