# KLEER POOL 20 CONCENTRATED SWIMMING POOL ALGICIDE

<b>ACTIVE INGREDIENTS:</b>	
Alkyl (C <sub>14</sub> , 58%; C <sub>16</sub> , 28%; C <sub>12</sub> , 14%)	
dimethyl benzyl ammonium chloride	20%
<b>INERT INGREDIENTS:</b>	80%
<b>Total Ingredients</b>	<b>100%</b>

This Algicide is formulated to complement swimming poolwater being treated with normal chlorine systems. It is especially effective against growth of algae and, being non-volatile, aids in maintaining pool water clarity and sparkle.

Pools in service should be maintained in the pH range 7.2 to 7.8 and with a free available chlorine reading between 0.6 and 1.5 ppm. The residual effectiveness of algicide tends to stabilize the total chemical treatment system.

This Algicide is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form, this chemical should not come in contact with high concentrations of chlorine. **DO NOT MIX ALGICIDE AND CHLORINE TOGETHER** when adding to the pool. These chemicals should be handled separately. This Algicide is economical, efficient and stable.

### DIRECTIONS:

For an initial application to a clean pool or when pool water is changed, use two quarts per 25,000 gallons of water.

If the pool has visible algae growth, treat with initial dose. Vacuum or clean pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure. When pool is free of visible algae, use the recommended maintenance dose.

For maintenance, use two ounces per week per 5,000 gallons of water. After each rain of consequence, add two ounces per 5,000 gallons of water in addition to the above amounts.

The appropriate amount of this algicide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool. Recirculation or swimming activity will assure rapid dispersion.

## DANGER

### KEEP OUT OF REACH OF CHILDREN

**DANGER:** Keep Out of Reach of Children Corrosive Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, ponds, streams or public water. Apply product only as specified on label.

Rinse empty container thoroughly with water and discard it

### TO DETERMINE POOL CAPACITY:

Rectangular pools--length times width times average depth (in feet) times 7.5 equals gallons.

Round and Oval pools average diameter times average diameter times average depth (in feet) times 5.9 equals gallons
