

SANTEE

SWIMMING POOL ALGAEICIDE

SANTEE is a concentrated swimming pool algaeicide which keeps pool water clear and free of visible algae and controls algae scums. When used as directed, SANTEE will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium mundatum* (black algae), *Phormidium retzii* (Square D algae), *Lyngbya versicolor* (blue green) and other swimming pool algae.

SANTEE is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap or other cleaners or premixed with other water treating chemicals. SANTEE works best when added by itself directly to pool water. SANTEE at use dilution is non-corrosive to inanimate hard surfaces.

FISH AND/OR WILDLIFE PRECAUTIONS

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified on this label.

ACTIVE INGREDIENTS:

n Alkyl (60% C ₁₂ , 30% C ₁₀ , 5% C ₈ , 5% C ₆) dimethyl benzyl ammonium chlorides	5%
n Alkyl (68% C ₁₂ , 32% C ₁₀) dimethyl ethylbenzyl ammonium chlorides	5%

INERT INGREDIENTS:

90%
100%

DANGER: KEEP OUT OF REACH OF CHILDREN

Corrosive. Causes severe eye and skin damage. Do not get in eyes or on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

NOTE TO PHYSICIAN

For treatment of damage, may contraindicate the use of certain drugs. Medical attention should be given. Irritation of skin may be needed.

EPA Est. 6869-NC-1
EPA Reg. No. 6869-8

DIRECTIONS FOR USE:

Initial Dose: 1 gallon SANTEE to 50,000 gallons of water. Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance Dose: 1 quart SANTEE to 50,000 gallons of water. Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If make up water is added at the rate of more than 10% per week of pool capacity, add 1 quart of SANTEE for each 10,000 gallons of fresh make up water added per week.

When swimming season is over, add 1 gallon of SANTEE to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

Do not reuse empty container. Return drums to drum conditioner or destroy by perforating or crushing and burying in a safe place away from water supply.

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, take milk or water while waiting for medical attention. Do not induce vomiting. Drink plenty of water.
