

NET CONTENTS: GALLONS

DIRECTIONS FOR USE: PROPANEX is a selective post-emergent herbicide for control of backward grasses and other weeds in rice. PROPANEX contains 3.5% active ingredient per gallon. It is mixed with water for spraying.

TIMING AND DOSAGE: Use PROPANEX at 1.5 to 2.5 lbs. active ingredient per acre for established rice. For backward grasses, use 1.5 to 2.5 lbs. active ingredient per acre.

Use 1.5 to 2.5 lbs. active ingredient per acre for established rice. For backward grasses, use 1.5 to 2.5 lbs. active ingredient per acre.

To avoid residues at harvest, do not apply after full tillering of rice or within 56 days before harvest. Do not exceed a total of 8 lbs. active per acre per season.

METHOD OF SEEDING: PROPANEX may be used on dry planted, flooded or broadcast, or on muddy or clear water planted rice. For best results, field should be uniformly level and have well prepared seedbeds free of large clods.

WATER MANAGEMENT BEFORE TREATMENT: Dry Planting: Plant in a moist seedbed or flood to germinate the rice.

Muddy Water Planting: If planting flood is usually maintained 1 to 2 inches after seeding.

In all methods of planting, flush the fields as often as needed to prevent drying and soil crusting and to aid the emergence of rice and grass.

Water management after treatment. Treated fields should always be flooded before a second infestation of grass has a chance to develop beyond the one leaf stage.

FERTILIZER: Use a fertilizer containing nitrogen, phosphorus and potassium in accordance with local recommendations.

CAUTION: KEEP OFF RICE PLANTS. Do not get on rice plants. Do not get on eyes. Do not get on face. Do not get on mouth. Do not get on hands. Do not get on feet. Do not get on clothes. Do not get on shoes. Do not get on socks. Do not get on underwear. Do not get on pajamas. Do not get on nightgown. Do not get on bathrobe. Do not get on towel. Do not get on blanket. Do not get on bedspread. Do not get on pillow. Do not get on blanket.
