

[6900-87]

This premium insecticide is ready to use and is recommended where fast results and maximum effectiveness are desired with use of a minimum amount of base oil.

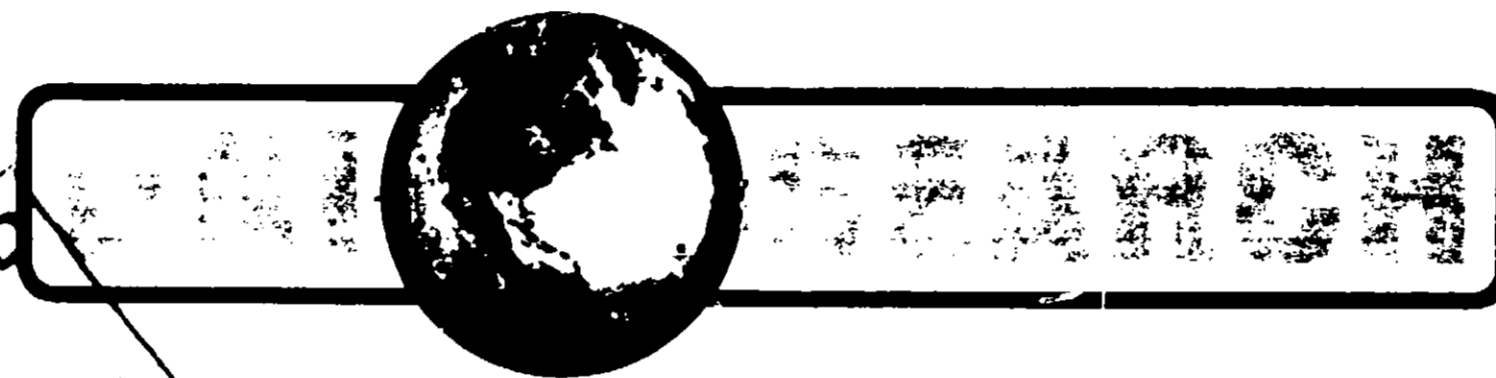

For flies, mosquitoes, fruit flies, gnats, flying moths, bees, hornets and other flying insects, spray with air nebulator at the rate of 1 oz. per 1000 cu. ft. For best results, close areas to be treated and keep closed for 10 minutes.

ROACHES, WATERBUGS, SILVERFISH
Spray liberally with foam around refrigerators, sinks, bathtub, toilet, around party shelves, and around cracks and crevices including wall woodwork, pipe openings, in walls and floor, and wherever these insects might hide. Repeat as necessary.

CARPET BEETLE
Thoroughly spray, treat areas and carpets, also treat cracks, crevices, baseboards and floors. Repeat as necessary.

BEDBUGS
Thoroughly spray, treat, mattress, springs and pillows, also taking particular care to treat all cracks and crevices, bedsteads, and tufts and seams on mattresses. Spray base boards, floor and window sills and walls around the bedstead.

FLIES
Use in kitchen, dining room, breakfast room, porch, and in areas where flies are common. Also treat windows, furniture, and sleeping quarters. Treat where there is a lot of fly breeding material.

UNI-MIST is especially formulated for use with mist sprayers such as the Atom, Klip-On, Microson and similar sprayers. UNI-MIST will also give fast results when used in the Dyna-Fog, Swinburn, Blitz-Fog, BV1 and similar foggers. UNI-MIST will give fast, effective results when used in hand, electric or power sprayers.

Harmful if swallowed. Keep out of reach of children. Avoid contamination of food, clothing, bedding, and other household items. Use as a space or contact spray for food processing plants when the plant is not in operation and removed or covered. Floors should be cleaned before reuse. Do not fog in presence of open flames. Combustible liquid, do not store near heat or open flame.
