DILUTION INSTRUCTIONS

For contact spraying and mist spraying using Challengers, Microsols, Klip-On, and similar equipment dilute one part DILL PYRETHRIN OS SYNERGIZED CONCENTRATE with nine parts oil.

For space and contact spraying with hand and pressure sprayers, dilute one part DILL PYRETHRIN OS SYNERGIZED CONCENTRATE with 19 parts oil and use as follows:

DIRECTIONS FOR USE

FLIES, MOSQUITOS, GNATS

Close area to be treated, direct spray toward ceiling and fill space with mist. Keep closed for 10 to 20 minutes. Repeat treatment as necessary.

ANTS

Thoroughly spray around door frames, baseboards, windows and food storage areas. Particular care should be taken to treat the ant trails. Repeat as necessary.

ROACHES, WATERBUGS, SILVERFISH

Spray liberally with force around refrigerators, sinks, all cabinets, around pantry shelves, into all cracks and crevices in molding and woodwork, pipe openings in walls and floors and wherever these insects might hide. Repeat as necessary.

CARPET BEETLES

Thoroughly spray infested rugs and carpets, also treat all cracks in baseboards and floor. Repeat as necessary.

CLOTHES MOTHS

Close lockers and thoroughly spray taking particular care to treat all seams and folds. Repeat application every thirty days or store treated articles in moth tight containers.

BEDBUGS

Thoroughly spray bedsteads, springs and mattresses taking particular care to treat all cracks and crevices on bedsteads, and tufts and seams on mattresses. Spray base boards, door and window casings, and wall cracks about the bedroom.

FLEAS

Spray liberal application to floor areas, carpets, baseboards, cracks and crevices. Also treat lower parts of furniture, animals sleeping quarters and wherever these insects may be suspected.

STORED FOOD AND PANTRY PESTS

The active ingredients in a spray made by diluting one part DILL PYRETHRIN OS SYNERGIZED CONCENTRATE with nine parts of suitable base oil are present in sufficient concentration to kill on contact the exposed (or accessible) stages of the granary weevil, rice weevil, confused flour beetle, rust red flour beetle, cadella, saw-toothed grain beetle, spider beetle, angoumois grain moth, Mediterranean flour moth, meal worm, cigarette beetle, drug store beetle, cheese skipper, cheese mite and grain mite.

Remove all packages of food and treat all interior surfaces of shelves and cupboards. Allow spray to dry thoroughly before returning packages to shelves. Infested food packages should be destroyed.

For best results spray thoroughly at rate of 1 gallon per 750 sq. ft. of surface with a hand or pressure type sprayer into cracks and crevices and other places where insects may be harbored in order to contact as many as possible.

DIRECTIONS FOR USE WITH RESIDUAL INSECTICIDES

DILL PYRETHRIN OS SYNERGIZED CONCENTRATE maybe combined with most residual insecticides on the market today.

DILL PYRETHRIN OS SYNERGIZED CONCENTRATE provides the double punch of fast knock down and deep flushing action to residual insecticides. Use one part concentrate to 20 to 60 parts finished insecticide depending on results desired.

DILUTION DIRECTIONS FOR THERMAL FOGGING

For use in thermal fogging such as Aero master, Dyna-Fog, BVI, and other thermal foggers dilute one part of DILL PYRETHRIN OS SYNERGIZED CONCENTRATE with four parts of base oil.

FOGGING INSTRUCTIONS

Flying insects such as flies, fruit flies, gnats, flying moths, mosquitos, and certain other small flying insects are killed almost immediately on contact.

Use at the rate of 1 oz. per 2000 cu. ft. of space. Cover foodstuffs to prevent contamination from falling insects.

For best results close area to be treated and keep closed for ten minutes.

Do not fog in presence of fire or open flame.
