

MIXING INSTRUCTIONS

Mix thoroughly one part of FUMARIN®-22 CONCENTRATE with nineteen parts of a suitable bait material such as corn meal, rolled oats, and stock food.

A small amount of an edible oil such as mineral, corn or peanut oil may be used up to 5% to prevent dusting and to increase acceptability.

When meat or fish is added to baits, dogs and cats will actively search out the bait placements. Therefore, baits must be placed so as to positively prevent feeding by these animals.

CAUTION

KEEP OUT OF REACH OF CHILDREN

See side panels for additional cautions.

DILL

USDA Reg. No. 6900-81

GENERAL DIRECTIONS

Place bait in locations where rats and mice feed, water, or travel.

Bait placements along walls, in corners, and in concealed locations where rats and mice can feed unobserved are desirable.

Bait should be placed in locations not accessible to children, pets, and domestic animals or in tamper-proof bait boxes.

DIRECTIONS FOR USE

FOR RATS: Use in amounts of 1/2 to 1 lb. per bait station.

FOR MICE: Use 1 to 2 oz. per bait station and use more frequent placement (every 8 to 10 feet)

Baits should be examined regularly and replenished before completely eaten.

For effective control baiting should be maintained continuously as long as feeding is observed. Average kill times are from 6 to 14 days but some feeding may continue for 3 to 4 weeks. Where reinfestation is likely, permanent bait stations should be used and bait placed in them as often as necessary.

* FUMARIN® -22 CONCENTRATE

KILLS RATS AND MICE

An Anti-coagulant Concentrate for preparing baits to kill rats and mice.

CONTAINS

ACTIVE INGREDIENT	By Wt.
3-(alpha-acetyl(furfuryl)-4-hydroxycoumarin*	.5%
INERT INGREDIENTS	99.5%
Total	100.0%
