

[6900-110]

DILL PYRETHRIN ROACH SPRAY CONCENTRATE has many applications in mills, elevators, granaries, warehouses, food plants, box cars and wherever food is prepared, stored, shipped or handled.

DILUTION DIRECTIONS

FLY SPRAY: For good fly spray, dilute one part DILL PYRETHRIN ROACH SPRAY CONCENTRATE with nineteen parts Petroleum Distillate.

ROACH SPRAY: For a roach spray, dilute one part DILL PYRETHRIN ROACH SPRAY CONCENTRATE with fourteen parts Petroleum Distillate.

THERMAL FOGGING COMPOUND: For a high-quality thermal fogging compound, dilute one part DILL PYRETHRIN ROACH SPRAY CONCENTRATE with five parts Petroleum Distillate.

CAUTION

KEEP OUT OF REACH OF CHILDREN

readily prepared for use with a pump or sprayer

USDA Reg. No. 6900-110

For best results spray thoroughly at rate of 1 gallon per 750 sq. ft. of surface with a hand or pressure type sprayer into cracks and crevices and other places where insects may be harbored in order to contact as many as possible.

FOGGING INSTRUCTIONS

Flying insects such as flies, fruit flies, gnats, flying moths, mosquitoes, and certain other small flying insects are killed almost immediately on contact.

Use at the rate of 1 oz. per 2000 cu. ft. of space. Cover foodstuffs to prevent contamination from falling insects.

For best results close area to be treated and keep closed for ten minutes.

Do not fog in presence of fire or open flame.

DIRECTIONS FOR USE

FLIES, MOSQUITOS, GNATS: Close area to be treated, direct spray toward ceiling and fill space with mist. Keep closed for 10 to 20 minutes. Repeat treatment as necessary.

ANTS: Thoroughly spray around door frames, base boards, windows and food storage areas. Particular care should be taken to treat the ant trails. Repeat as necessary.

ROACHES, WATERBUGS, SILVERFISH: Spray liberally with force around refrigerators, sinks, all cabinets, around pantry shelves, into all cracks and crevices in molding and woodwork, pipe openings in walls and floors and wherever these insects might hide. Repeat as necessary.

STORED FOOD and PANTRY PESTS: The active ingredients in a spray made by diluting one part DILL PYRETHRIN ROACH SPRAY CONCENTRATE with fourteen parts of suitable base oil are present in sufficient concentration to kill on contact the exposed (or accessible) stages of the granary weevil, rice weevil, confused flour beetle, rust red flour beetle, cadella, sawtoothed grain beetle, spider beetle, angoumois grain moth, Mediterranean flour moth, meal worm, cigarette beetle, drug store beetle, cheese skipper, cheese mite and grain mite.

Remove all packages of food and treat all interior surfaces of shelves and cupboards. Allow spray to dry thoroughly before returning packages to shelves. Infested food packages should be destroyed.

A SYNERGIZED OIL CONCENTRATE

PYRETHRIN ROACH SPRAY CONCENTRATE

A Synergized Pyrethrin Concentrate in a Highly Refined Petroleum Base for Dilution and Use as a Fast Knock Down and Deep Flushing Agent for Ants, Gnats, Flies, and Roach Sprays and Fogging Compound.

NET CONTENTS

CAUTION

Harmful if swallowed. Keep out of reach of children. Avoid contamination of Feed and Foodstuffs. Use as a space or fog spray in food handling and food processing areas only when plant is not in operation and exposed foods are removed or covered. Food handling surfaces should be cleaned before reuse.

Combustible liquid, do not use, spill, pour, or store near heat or open flame.

Lot No.
