CONTACT INSECTICIDE FOR FOOD ESTABLISHMENTS USDA REG. NO. 6913-II

Active Ingredients 100%	% by Weight
Pyrethrins	0.064
n-Octyl Sulfoxide of Isosafrole	0.117
2-Butoxyethanol	0.231
Deodorized Kerosene	10.195
	100.000

*Equivalent to 0.460 n-Octyl Sulfoxide of Isosafrole and 0.050 related compounds.

CAUTION!

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Ab-O-Cide is a combustible mixture and should not be sprayed into, or near, an open flame. All pilot lights should be off while spraying. Avoid contamination of food and foodstuffs. Do not spray into, or on, food or food materials. Cover all food processing surfaces and close or cover all food processing equipment. Do not spray in areas where food processing is in progress.

USDA Reg. No. 6913-II

Ab-O-Cide is a high kill contact insecticide for wholesale grocers, supermarkets, bakeries, dairies, bottling plants, packing plants, breweries, mills and other establishments where food is processed or stored. When used as directed, this product will kill house flies, weevils, flour beetles, saw-toothed grain beetles, grubs, and other insects on contact.

PREPARATION

Area to be sprayed should be thoroughly cleaned by removing accumulations from all cracks, shelves, beams, and on and around packages of stored food products. Close doors and windows and keep closed for 10 to 15 minutes after spraying. Sweep up and dispose of fallen insects. Before treating, vacate the area and ventilate it after treatment.

Where to Spray - Spray Ab-O-Cide into the air in the form of a fine mist or fog to control flies and gnats. Spray under and around all equipment and racks, into all cracks, crevices and corners, on floor, doors, walls and ceilings to control the stored insects.

When to Spray - Ab-O-Cide should be sprayed once a week as a regular procedure, and only if cases of insect infestation.
