

GENERAL DIRECTIONS

BAIT-TOX RAT & MOUSE KILLER IN Meal Form is designed for use in all areas except where it is moist. Be sure that sufficient bait Tox Rat and Mouse Killer is on hand to complete a continuous feeding program. Replace bait as necessary. It is important to obtain additional bait when exhausted. Avoid a delay of more than 1 or 2 days in the feeding program. Continuous, uninterrupted feeding is what gives control. Do not use decomposed, mouldy, or sour bait. Where a continuous source of infestation prevails from nearby dumps or fields, permanent bait stations should be used and BAIT-TOX RAT & MOUSE KILLER replenished as needed. Baiting should continue until complete lack of feeding is noted.

DIRECTIONS FOR HOUSE MICE

For control of house mice, place a small quantity of 1 ounce amounts of BAIT-TOX RAT & MOUSE KILLER at night feeding intervals where mice feed, water and travel. An uninterrupted supply of bait must be maintained for at least 10 days.

DIRECTIONS FOR NORWAY AND ROOF RATS

For control of rats, place 4 to 16 ounces of bait per bait location.

An uninterrupted supply of bait must be maintained for approximately 10 days.
