

[6959-24]

SPRAY-TOX contains Pyrenone* and a very high grade petroleum base.

SPRAY-TOX is pleasant and effective to use.

SPRAY-TOX may be used about food or equipment when applied as directed, but it should not be sprayed directly onto food or utensils used in preparing food.

SPRAY-TOX will not stain clothing, drapes, or upholstered furniture, etc., if properly used.

SPRAY-TOX should be atomized at a distance of 4 or 5 feet from fabrics. Do not wet the fabric or surfaces with liquid.

SPRAY-TOX is very toxic to many kinds of insects, and tests well above the minimum requirements for AA Fly Spray.

SPRAY-TOX is especially manufactured to kill flies, roaches, mosquitos, moths, cereal insects, silverfish and certain other household insects.

SPRAY-TOX is especially effective and suitable for industrial use in flour mills, candy plants, meat packing plants, bakeries, restaurants, dairies and dairy plants, hotels and other places where food is handled, for control of the exposed stages of flour beetle, cadelles, saw tooth grain beetle, confusca flour beetle, Mediterranean flour moth, mites, skippers, chocolate moth, cigarette beetle, and Angoumois grain moth. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when facility is not in operation.

SPRAY-TOX leaves no unpleasant odor.

SPRAY-TOX

INSECTICIDE CONTAINS PYRENONE*

SPRAY-TOX is very toxic to many kinds of insects, and tests well above the minimum requirements for AA Fly Spray.

SPRAY-TOX is especially manufactured to kill flies, roaches, mosquitos, moths, cereal insects, silverfish and certain other household insects.

SPRAY-TOX is especially manufactured for use in modern steam Vaporizing and Fog Type Sprayers. Small potent particles fill the air giving quick knock-down and high kill; can be used in any type sprayer.

Reg. U. S. Pat. Off. U. S. A.

CAUTION: Harmful If Swallowed.

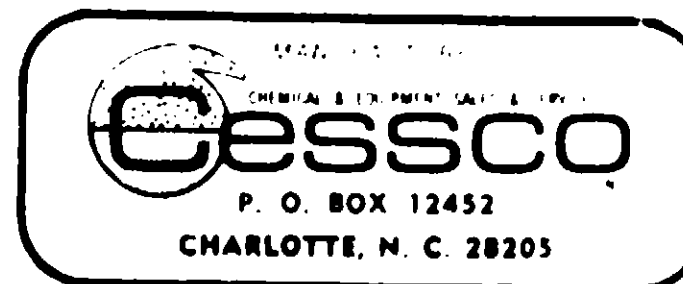

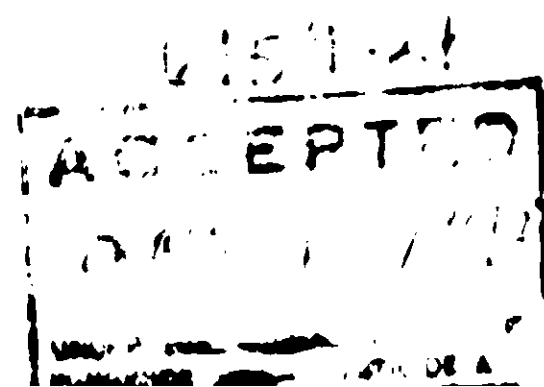

KEEP OUT OF REACH OF CHILDREN

Fire Hazard: Do not use or store near heat or open flame.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place.

ACTIVE INGREDIENTS 100%

Pyrethrins	0.149%
Piperonyl butoxide technical	0.748%
Petroleum distillate	99.103%
Butylcarbityl 6-propylpiperonyl ether 0.598	
Related compounds 0.150%	

DIRECTIONS

FLIES—For house flies, stable flies and other flies: Close room and fill the air with a mist, allowing it to penetrate hiding places for at least 10 minutes. Use 2 oz. per 1,000 cubic feet.

ROACHES, SILVERFISH—Cover food and non-rainers and spray infested areas thoroughly, directing the sprays against the insects and into such hiding places as cracks, crevices and cabinets. Repeat the application in 15 days to kill young roaches that hatch from eggs or use as needed.

GRAIN INSECTS—For control of accessible stages of flour beetles, cadelles, saw tooth grain beetles, bran bugs, Mediterranean flour moths, chocolate moths, Angoumois grain moths, cigarette beetles and ham and cheese mites, thoroughly clean the food processing plants, cover receptacles and foods, and follow with a thorough application of SPRAY-TOX against the exposed stages of these insects, as well as into their hiding places. Use 1 oz. per 1,000 cubic feet. The intervals between treatments will depend upon the thoroughness of these procedures. Repeat the application when it is needed. Use only when plant is not in operation.

FLYING MOTHS AND AID IN MOTH CONTROL
Spray rooms, closets, other open areas where clothes are kept. Fill room with heavy mist or fog. Spray closets with heavy mist or fog. Spray closets thoroughly directly on clothing, with care not to wet clothing. Give special attention to lapels, open cuffs, seams, etc., where moths are likely to be found. After thorough spraying, keep rooms, closets, etc., closed for 30 minutes. Repeat at least once every 30 days. For storing treated clothes in sealed containers, mothproof bags, trunks, etc., spray containers thoroughly without wetting. Seal.

MOSQUITOS—Spray upwards into the air, filling premises with a mist. Keep all openings closed at least 10 minutes. Sweep up and remove dead insects.

BEDBUGS—Spray entire room thoroughly, creating heavy fog or mist. Spray mattresses with particular emphasis on tufts and seams. Spray all parts of bedstead, cracks and crevices, and under and behind boards, base, wallpaper, etc., which are likely to hide. Repeat as required.

CARPET BEETLE—Spray rug thoroughly, under and behind as traps. Do not wet. Spray under and behind boards and floors. Repeat as required.
