

Cessco

AccuDose

For Roaches: German, American, Oriental, Brown Banded

DIRECTIONS

Cessco's AccuDose specific dosage residual spray is for treatment into crevices, holes, cracks and corners where these insects may be hiding, living and breeding.

With the rigid applicator extension placed into cracks, holes, crevices and similar small openings where these insects may be a problem, release approximately 1 second of spray per spot in serious infestation areas. If possible, space these applications 12" apart. In lightly infested areas, or for preventive treatment, space applications approximately 3 feet apart.

For use by servicemen working for professional exterminators, in homes, hospitals, food processing plants, restaurants, super markets, hotels and motels. Cautions must be taken so no material comes in contact with exposed food products, equipment, or packaging materials. They must be removed or covered before use. Do not use in commercial food preparation areas or in edible product areas of food processing plants.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130 F may cause bursting. Never throw container into fire or incinerator.

May be harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should be avoided. Wash thoroughly after using.

Do not treat any area where human contact is possible.

Avoid contamination of food, utensils, and food preparation area. Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

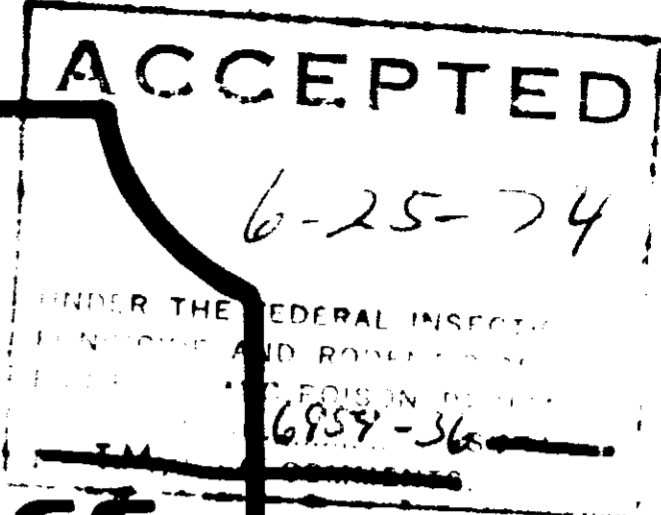

Do not allow children and pets to contact treated areas until surfaces are dry.
