DIRECTIONS FOR APPLYING

CESSCO ACCUDOSE 20

For unshelled peanut warehouses

IMPORTANT- First read the precautions printed on Right Panel of Label.

ENTOMOLOGICAL RECOMMENDATIONS: When applied as an aerosol, CESSCO ACCUDOSE 20 is recommended for use in peanut warehouses for the control of the Almond Moth, Ephestia cautella (Walker) and the Indian Meal Moth, Plodia interpunctella (HBN).

GENERAL INFORMATION: CESSCO ACCUDOSE 20 applied as an aerosol in warehouse areas kills by contact. The vapor will give good control of moths and will also kill exposed larvae.

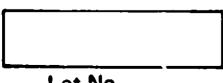

Peanut insects are most active between 5:00 p. m. and midnight. For this reason, aerosols applied between 5:00 p. m. and midnight give best results. Large quantities of peanuts can be treated rapidly and with relative economy.

PREPARATION OF WAREHOUSE AREAS: The preparation of warehouse areas is based primarily on the number of cubic feet of area to be treated. Several CESSCO ACCUDOSE 20 nozzles can be mounted and wired in series. This enables two or more nozzles to be activated simultaneously through the use of a single electrical switch. The number of nozzles is based on an application rate of 2.5 grams of CESSCO ACCUDOSE 20 per 1000 cubic feet (.5 gram of DDVP per 1000 cubic feet). A double nozzle activated for a period of 45 seconds would treat approximately 50,000 cubic feet of area.

Treated warehouses should not be entered for a period of four hours after application, or until aerosol particles have settled.

Do not attempt to refill an empty cylinder. When empty, close valves and return to manufacturer or dealer.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130 F may cause bursting. Never throw container into fire or incinerator.

ACCEPTED

JUN 2 4 1975

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under / C.

CESSCO ACCUDOSE 20

FOR UNSHELLED PEANUT WAREHOUSES FOR PEST CONTROL OPERATOR USE ONLY

TO BE USED ONLY WITH ACCUDOSE AEROSOL PIPING SYSTEM WITH AUTOMATIC TIMER AN AEROSOL INSECTICIDE CONTAINING

20% VAPONA

FOR THE CONTROL OF PEANUT INSECTS

ACTIVE INGREDIENTS:		:			В	y Weight
2,2-Dichlorovinyl Dimethyl Phosphate						18.6%
Related Compounds						.1.4%
INERT INGREDIENTS						80.0%
Total						100.0%

Shell Registered Trademark

POISON DANGER

VAPOR EXTREMELY HAZARDOUS Keep out of the reach of children

See antidote statement and other precautions on the back/side Materil.

Read all of label carefully. Use only as directed.

Placard must be placed outside of treated area.

Poisonous if swallowed, inhaled or absorbed through skin. Do not breathe vapor. Do not get vapor or liquid in eyes on skin or on clothing. Keep away from feed and food products. Keep away from heat and open flame.

WHEN HANDLING ALWAYS USE GAS MASK APPROVED BY U.S. BUREAU OF MINES TO GIVE ADEQUATE PROTEC-TION AGAINST VAPONA® and have an extra approved mask in case of emergency.

Net Wt. 200 Lbs. Pat. No. 3,614,841. Other patents pending. E.P.A Reg. No. 6959-41 E.P.A. Est. No. 6959-NC-1

> A Product of Cesso, Inc.

P.O. Box 12452 / Charlotte, N.C. 28205

HERATE ENGLISHED STORY OF STORY OF STORY

Do not get on skin or in eyes. Do not breathe fumes. Wear natural rubber gloves, water-proof protective clothing and noggles when handling. Wear a mask or respirator of a type passed by the U.S. Bureau of Mines for protection against this naterial.

In case of contact, wash immediately with soap and water. Wash hands, arms, and face thoroughly with soap and water before eating or smoking. Wash all contaminated clothing with soap and hot water before reuse.

ANTIDOTE AND FIRST AID TREATMENT

ATROPINE is the emergency antidote for VAPONAT insecticide poisoning. Consult your physician about obtaining an adequate supply of 1/100 grain at opine tablets for emergency use. CALL A PHYSICIAN IMMEDIATELY IN ALL CASES OF SUSPECTED POISONING.

INTERNAL: If the VAPONAT has been swallowed, induce vomiting immediately. This may be done by introducing a finger into the throat or by giving warm sait water (1 tablespoon of salt to a glass of water) NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON

EXTERNAL of the VAPONAT has been speed or the skin, immediately remove obtained from the vicinity of the insectioide, remove all contaminated ciothog, and of skill with soap and running water. If the material gets in the eyes, wash rediately with running water for at least too minutes.

F WARNING SYMPTOMS APPEAR: Administer two 1-100 grain atropine tablets correctiately. NEVER ADMINISTER ATROPINE UNLESS WARNING SYMPTOMS APPEAR (See WARNING SYMPTOMS below).

- Keep patient prome and quiet.
- Start artificial respiration, minordiately if patient is not breathing.
- Transport the patient immediately to the nearest physician

NOTE TO PHYSICIAN

WARNING SYMPTOMS: Symptoms include weakness, headache, tightness in chest, blurred vision, non-reactive pin point pupils, sanvation, sweating, mauser, continuous, diarrinea and abdominal gramps.

TREATMENT. Atropine is the specific theraped of antagonist of choice against parasympathetic hervous stimulation. If there are signs of parasympathetic stimulation, it topine sulfate should be injected at 10-m mate intervals, in doses of 1 to 2 milligrams unto complete atropinization has occurred 2 PAM is also antidotal and may be administered in conjunction with atropine.

- Morphine is contraindicated.
- Clear chest by postural drainage
- Observe patient continuously for 48 hours.
- Repeated exposure to cholinesterase inhibitors may, without warning, cause prolonged susceptibility to very small doses of any cholinesterase inhibitor.
- Allow no further exposure until time for cholinesterase regeneration has been allowed as determined by blood test.
