

Sear 21 Plus

DIRECTIONS:

Use red and white sprayer provided . . .

For pin-point application, remove spray nozzle and attach "jet-stream" nozzle . . .

(see card for detailed attachment instructions.)

To control perennial weeds and grasses such as smooth brome, Canada bluegrass, purpletop, quackgrass, broomsedge, aster, dandelion, dog fennel, goldenrod, plantain, and wild carrot apply 3 to 5 oz. per 10 sq. ft. For other HARD-TO-KILL perennial weeds and grasses such as Johnson-grass, saltgrass, bouncing bet, bracken fern and horsetail apply 4 to 6 oz. per 10 sq. ft.

Apply SEAR at any time of year except when the ground is frozen. Best results are obtained after predominant species are well established in late spring or early summer.

SEAR is a liquid weed killer to be applied undiluted as a spray on noncropland areas where bare ground is desired. The degree of weed control and duration of effect will vary with the amount of chemical applied, soil type, rainfall and other conditions.

This product is toxic to fish and wildlife. Keep out of lakes, streams and ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

IMPORTANT: Do not apply on, or clean equipment near desirable trees or other plants, or in areas where their roots may extend, or in locations where the chemical may be moved into contact with their roots. Do not use on lawns, walks, driveways or similar areas. Vapors from this product may injure susceptible plants in the immediate vicinity. Keep from contact with fertilizers, insecticides, fungicides and seeds. Clean application equipment after use. Prevent drift or spray mists to desirable plants. Use coarse sprays. Do not re-use this container.

ACTIVE INGREDIENTS

Petroleum Distillates	96.00%
2,4-Dichlorophenoxyacetic Acid, Isooctyl Ester*	1.10%
Bromacil (5-Bromo-3-Sec-Butyl-6-Methyluracil)	0.61%
Pentachlorophenol	0.79%
Other Chlorophenols	0.09%
INERT INGREDIENTS**	1.41%

*2,4-Dichlorophenoxyacetic Acid equivalent to 0.70%
 **Contains Anti-Drift Factors
