WHAT IS TRU-CLOR?

TRU-CLOR is a dry, easy to handle granular calcium hypochlorite containing 70% available chlorine for treating swimming pool water.

DIRECTIONS FOR USE

Maintain a chlorine residual of 0.6 to 1.0 parts per million (ppm) and a 7.2 - 7.6 pH range. Use an orthotolidine chlorine test kit for available chlorine determinations and a phenol red pH test kit for proper pH determinations.

For Initial Chlorination of any pool water add 1 ounce of Tru Clor for each 1,000 gallons.

For Subsequent Chlorination apply 1 ounce per 5,000 gallons of water daily or as needed to maintain 0.6 to 1.0 ppm residual chlorine.

**NOTE: ONE LEVEL CAPFUL
HOLDS 1½ OUNCES OF TRU CLOR.**

Application:

Apply the recommended amount directly to the pool water by sprinkling it or spreading it over the surface of the water as you walk around the edge.

TRU-CLOR not only controls the growth of most bacteria and algae in your pool but also supplies a chlorine residual in the water that kills many new bacteria carried into the pool by bathers. It is a multi-purpose bactericide and disinfectant.

ACCEPTED

JUN 13 1967

111-2

DI-HALO[®] conditioner

24 LBS. NET. WT.

**FOR USE WITH
Granulated DI-HALO Water Disinfectant**

DI-HALO CONDITIONER DISSOLVES READILY AND COMPLETELY IN SWIMMING POOL WATER. IT DOES NOT DISINFECT THE WATER, BUT PROTECTS THE BROMINE AND CHLORINE FROM BEING DISSIPATED BY HEAT AND SUNLIGHT.

DIRECTIONS FOR USE:

USE ONE POUND OF CONDITIONER FOR EACH 5,000 GAL. OF POOL WATER. CONDITIONER MAY BE ADDED THROUGH THE SKIMMER OR SPRINKLED DIRECTLY INTO THE POOL WATER. CONDITIONING THE WATER IS NECESSARY ONLY ONCE EACH SEASON - PREFERABLY AT THE INITIAL POOL FILL OR BEGINNING OF THE SEASON.

ACTIVE INGREDIENT: DIMETHYLHYDANTOIN.

**KEEP OUT OF REACH OF CHILDREN
NOT TO BE TAKEN INTERNALLY**
