DIRECTIONS FOR USE

Use to spot-treat weeds in the lawn. For best results, apply when weeds are actively growing. Do not water within 24 hours after spraying.

Shake well. Germain's Spot Weeder is designed to permit easy treatment of lawn weeds without bending or stooping. Invert can, aim at weed and press valve. Only a short burst is needed. Overspraying only wastes the spray.

Effects begin to show after a few days and weeds gradually die. Up to 4 weeks may be required for complete kill. Repeat in 3 to 4 weeks if necessary.

For lawns with many weeds requiring an overall treatment, spray with Germain's Improved Broadleaf Weed Killer.

CAUTION: Avoid contact with skin or clothing. In case of contact, flush with plenty of water; for eyes get medical attention. Wash after each use.

Avoid spraying susceptible plants (flowers, shrubs, etc.). Bentgrass, Carpetgrass, St. Augustine grass and Dichondra may be injured if contacted. Do not apply within drip line of desirable plants. Do not store near seeds, fertilizers, insecticides or fungicides.

Avoid accidental drift or application to nearby garden plants, flowers or shrubs. Do not contaminate water used for irrigational or domestic purposes.

Temperatures over 120° F may burst container. Contents under pressure. Do not use near fire or open flame. Store in cool place (not over 120° F) but protect against freezing. Never throw in fire or puncture this container.
