GERMAIN'S HOME & GARDEN INSECT SPRAY DIRECTIONS FOR USE

Shake well before using and occasionally during use. Point valve away from face. Hold container upright and apply in short bursts.

INDOOR: TO KILL FLIES, MOSQUITOES, SMALL FLYING MOTHS, GNATS For best results, close all doors and windows, and direct spray upward into center of room with a slow sweeping motion for 5 to 10 seconds for an average room. Fill room with a fine mist. Keep nozzle three feet from surfaces. Keep room closed for 15 minutes after spraying. Do not remain in treated areas. Ventilate room before reentry. Before spraying, cover exposed food and utensils. Repeat as needed.

TO KILL ANTS, ROACHES, SPIDERS AND CRICKETS. Spray directly on insects whenever possible in addition to thorough spraying of all parts of the room suspected of harboring these pests. Spray baseboards, behind cupboards, cracks, crevices, moist areas and openings around sinks and pipes. For control of Ants, treat doors, window frames, ant trails and other areas of entry. Repeat as necessary.

TO KILL EXPOSED FORMS OF CONFUSED FLOUR BEETLES, SAWTOOTHED GRAIN BEETLES AND RICE WEEVILS. Locate and destroy infested packaged goods. Remove all other items from pantry or food storage area. Spray shelves to kill any of the named insects present. Place clean paper on the shelves and return packages after shelves have dried. Repeat as necessary.

OUTDOORS: TO KILL FLIES, MOSQUITOES, GNATS AND SMALL FLYING MOTHS present at time of treatment: Spray area infested with these listed flying insects. Follow precautions listed above under directions for use. Hold container 24 inches from shrubs, bushes and grassy areas. Avoid wetting plants. Spray these areas with a slow sweeping motion at rate of 1 to 3 seconds per cubic yard of space while moving away from treated areas. Spray only when the air is still. Allow to dissipate before occupying the treated area. Repeat as necessary.

TO KILL WASPS Spray directly on insects whenever possible in addition to thoroughly spraying (at least 4-6 seconds) their nests from a distance of approximately 2 ft., soaking the nest with spray. To avoid being stung make applications at dusk, or at other times when wasps are not active.

FLOWERS AND ORNAMENTAL PLANTS: For insects on Azaleas, Begonias, Chrysanthemums, Dahlias, Gladioli, Irises, Marigolds, Petunias, Roses and Snapdragons. Also, for specified insects on Evergreens, Small Ornamental Deciduous Trees, Shrubs and Ornamental Vines. Do not spray on vegetable crops. Germain's Home & Garden Insect Spray will kill Aphids, Leafhoppers, Spotted Mites, Thrips (exposed), Armyworm Larvae, Climbing Cutworms and Japanese Beetles when sprayed directly on listed insects. Repeat as needed. When spraying keep can 24 inches (2 ft.) from plant. Avoid wetting foliage with spray. Spray with caution on young plants and new growth. Do not spray when temperatures exceed 90°F.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F. may cause bursting. Never throw container into fire or incinerator.

CAUTION: KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Do not inhale vapors or spray mist. When used where food is prepared, food should be removed or covered during treatment. Cover all food preparation surfaces during treatment and thoroughly clean surfaces before re use.

Remove pets, birds and cover fish aquariums before spraying.
