Product Code 53244

DIRECTIONS FOR USE

WHERE TO USE

Use anywhere plant growth is not wanted to kill weeds and prevent new growth. Use on driveways, walkways, parking areas, under fences, around garages and other buildings, and, similar non-crop areas.

WHEN TO USE

ALL OUT WEED KILLER may be used at any time. It is easier to apply effectively before weeds and grass get large.

INSTRUCTIONS FOR USE

With any application method it is important to apply the right amount of chemical on area treated regardless of amount used. The dosage is a minimum of one quart per 125 square feet of area. Initial activity is improved if soil is moist from rain or sprinkling before application.

SPRAYER APPLICATION

Add two quarts of ALL-OUT WEED KILLER to two quarts of water. Spray weeds to wet. Also spray soil surface to prevent new weed seedlings from germinating. Apply mixture to 250 square feet. Where weeds are tall or extended control is desired, apply to 150 square feet.

SPRINKLER CAN APPLICATION

Add one quart of ALL-OUT WEED KILLER to two gallons of water. This will treat 125 square feet. Sprinkle as evenly as possible, wetting both the soil and growing plants. Where weeds are larger or extended control is desired, apply to 75 sq. ft.

CAUTION: Do not apply directly to or otherwise permit ALL-OUT WEED KILLER to come into contact with desirable turf, vegetables, ornamentals or other such plants. Coarse sprays are less likely to drift. Do not spray over areas where soil may contain roots of desirable shrubs or trees. There may be a slight staining of patio blocks. Clean spray equipment thoroughly before using for other purposes.
