TRANSPLANT STARTER

Stops transplant shock and wilt due to root damage.

You Get Results With

BEST

DIRECTIONS:

Mix 1 teaspoonful of Transplant Starter to 1 quart of water. Saturate plant mix thoroughly around plants at time of transplanting.

This material has been used by home gardeners and commercial plant growers of bedding plants, rooted cuttings, bare root and "caned" rose trees, shrubs, ornamentals and other similar newly transplanted plants to stimulate root growth and reduce wilting. Also prevents shock while planting house plants.

FUNCTIONAL FOR ECONOMIC REGISTERED UNDER NO. 680,721 SUBJECT TO ATTACHED COMMENTS.
