1. Use only on Dichondra lawns.
2. Apply anytime of the year. For optimum weed control, first application should be made in January or February.
3. For suppression of Bermuda Grass, initial application should be followed by another application 6 weeks later.
4. To insure continuous weed control, repeat the application every six months. Do not apply over three times a year. For interim feeding, use Best Lawn Fertilizer.
5. Apply when dichondra leaves are dry. Make certain that granules are off leaves and down to soil surface.
6. To activate this product, wash off of leaves immediately after application, then water thoroughly. Avoid drift to desirable plants.
