

GENERAL VEGETATION CONTROL:

DRY APPLICATION: Apply 1 1/2 to 2 lbs. per 100 sq. ft. Water thoroughly. Lighter rates should be used only when weeds are first emerging on treated soil. The higher rates may be necessary to provide extended residual control.

SPRAY APPLICATION: Dissolve 1 1/2 to 2 lbs. of product in 1 to 2 gallons of water to cover 100 sq. ft. Apply as a contact spray thoroughly wetting all parts of plant particularly the growing tips. This mixture is usually adequate for young growth up to 6 inches high. The higher rates may be necessary to ensure thorough coverage of heavy vegetation or to provide extended residual control.

JOHNSON, BERMUDA AND QUACK GRASSES, CANADA THISTLE AND BIRDWEED.

DRY APPLICATION: Apply 1 to 3 lbs. per 100 sq. ft. **WATER THOROUGHLY.** The heavier rates may be necessary to provide extended residual control.

SPRAY APPLICATION: Dissolve 1 to 3 lbs. of product in 1 to 2 gallons of water to cover 100 sq. ft. **SPRAY AS PER GENERAL VEGETATION CONTROL.**

NONCULTURAL NOTE: Keep spray off cultivated ground or away from drip line of trees. Keep spray off roots of valuable plants. Avoid using near desirable trees, shrubs or plants. If application is too close, spray may leach through soil causing injury to desirable plants. Apply on calm days to lessen the hazard of desirable plant injury due to possible drifting of spray. Do not drain or flush equipment on or near crop or desirable plant areas.

NOTICE: Seller warrants that this product consists of the ingredients specified and is reasonably fit for use as directed on the label. No one is authorized to make any other warranty, guarantee, or direction concerning this product. Because the time, place, rate of application, and other conditions of use are beyond Seller's control, Seller's liability from the handling, storage, and use of this product is limited to replacement of product or refund of purchase price.

Net Wt. 1 1/2 lbs. (680 g)

Granular Soil Sterilant

READY-TO-USE MONOBOR-CHLORATE 'D'

WHAT IT IS AND WHAT IT DOES

Granular Soil Sterilant is specifically formulated for quick knock down and control of general mixed vegetation and such perennial grasses as Johnson Grass, Dallas Grass and Reed Grass (Panicum) on non-cropped land and industrial sites. This product may provide season long control of seedlings on treated areas. Soil type, water application, and length of growing season will influence the residual control of seedlings. This material is not selective in action and may be toxic to all types of vegetation and may render the entire treated area totally or partially unproductive for one or more years.

**PRECAUTIONARY STATEMENTS -
 HAZARDS TO HUMANS AND DOMESTIC ANIMALS
 CAUTION**

KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Avoid contact with eyes, skin, and clothing. Wash thoroughly after handling. Avoid contamination of feed and foodstuffs. Keep children and animals off treated areas until rainfall has leached the herbicide into the soil.

ENVIRONMENTAL HAZARDS

Do not contaminate domestic or irrigation water. Do not store in direct contact with ground or concrete. Apply this product only as specified on this label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

KEEP CONTAINER TIGHTLY SEALED DURING STORAGE. Do not reuse empty container. Wrap container and put in trash collection.
