DIRECTIONS FOR USE

Do not apply this product for any uses other than those specified on the label. ZIPP 6-12-12 is a complete turffood containing sulfur, iron, and zinc in addition to the primary nutrients formulated in a manner that promotes optimum turf nutrition.

For uniform application set the spreader for $\frac{1}{2}$ the recommended rate and apply one-half the total amount over the area to be treated, moving in one direction at a steady rate. Spread the remaining half quantity over the same area, this time moving at right angles to the first application.

For the control of Brown Patch (*Rhizoctonia solani*) in warm season (Southern) grasses, such as Bermuda or St. Augustine and vigorous turf growth, apply ZIPP LAWNFOOD 6-12-12 FUNGUS CONTROL at the first signs of the disease in either fall or spring with a second application 3 to 4 weeks later. Use a rate of 50 pounds (one sack) per 1500 sq. ft. Water the treated area lightly to wash the product onto the soil.

EPA Reg. No. 10659-34

CONDITIONS OF SALE

1. Seller warrants that this product consists of the ingredients specified and is reasonably fit for use as directed on the label. No one, other than an officer of Seller, is authorized to make any warranty, guarantee or direction concerning this product. 2. Because the time, place, rate of application and other conditions of use are beyond Seller's control, Seller's liability from handling, storage and use of this product is limited to replacement of product or refund of purchase price.
