#### DIRECTIONS FOR USE:

**INITIAL DOSE:** When system is noticeably fouled, apply 1.0 to 2.0 pounds of Formula 614 per 1000 gallons of water in the system. Repeat initial dosage until 1 ppm chlorine residual is established, as determined by a chlorine test kit.

**SUBSEQUENT DOSE:** When microbial control is evident, apply 1/2 to 1.0 pound per 1000 gallons of contained water. Repeat as needed to maintain 1 ppm of chlorine residual in the recirculating water for at least 4 hours. Test water frequently enough to insure proper chlorine residual. This product should be applied to the water basin at a point where good mixing occurs. Badly fouled systems must be cleaned before treatment is begun.
