

CAUTION:

Hazards to Humans & Domestic Animals: Avoid inhalation of spray mist. Avoid contact with skin and eyes. In case of contact, immediately flush skin with plenty of water.

Do not install directly over any food handling or dispensing area.

Do not use in nurseries or room where infants, ill or aged persons are confined.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish, birds and other wildlife. **DO NOT APPLY DIRECTLY TO WATER.** Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

Physical or Chemical Hazards: Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

ACTIVE INGREDIENTS

Pyrethrins	100%
Piperonyl Butoxide Technical*	2.00%
Nicetyl bicycloheptene dicarbonyl amide	3.34%
Penta cum Hydrocarbons	13.66%
	100.00%

INERT INGREDIENTS

*Equivalent to 1,6-dimethyl-2-ethyl-3-cyano-4-isopropyl-5-phenyl-2-pyrrolidone and 4-isopropyl-2-pyrrolidone.

BIG D INDUSTRIES, INC.

P.O. Box 82275 • Oklahoma City, OK • 73148

WARNING — Contains a chlorofluorocarbon that may harm the public health and environment by reducing ozone in the upper atmosphere.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

BIG "D" Concentrated Aerosol Insect Killer contains a highly effective insecticide formulation specially designed for use in automatic mist dispensing units.

May be used against flying insects such as flies, gnats, flying moths and mosquitoes in non-residential food handling establishments, with care not to mount directly over food handling and dispensing areas. May also be used in the space spraying of aircraft.

STORAGE AND DISPOSAL

Storage: Store in a cool area away from heat and open flame. Do not store above 120°F.

Disposal: Do not contaminate water, food or feed by storage or disposal. Do not puncture or incinerate container. Do not reuse container. Securely wrap original container in several layers of newspaper and discard in trash.

FOR USE IN AUTOMIZER AUTOMATIC DISPENSER: One Automizer unit should be installed for each 6,000 cubic feet of space to be treated. The Automizer activates BIG "D" 100mg. valve once every 15 minutes, after two hours of operation, enough BIG "D" is suspended in the air to kill a substantial proportion of the flies, mosquitoes and gnats present. Usually the effectiveness of BIG "D" will be noticeable within one hour after the Automizer is activated. If less than 24 hour control is required, the Automizer should be set to start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperature all affect insect activity and control. Therefore, one unit per 6,000 cubic feet should be considered as a guide. Adjustments made depending on specific conditions of place of usage. As with any method of insect control, best results are obtained when sanitation and other positive insect-prevention practices are followed.

This 12-oz. can of BIG "D" contains approximately 3,300 sprays sufficient to sustain operation for a total of 825 hours (35 days on a clock basis) or 68 days on a 12-hour basis. When used on a 24-hour basis, it is suggested that the container be changed once a month, once every 2 months on a 12-hour basis.

Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations.
