

DIRECTIONS FOR USE

For general cleaning and disinfecting in one operation, use 3 ounces of Fremont 9933 Disinfectant to 5 gallons of water or for porous or extremely dirty surfaces, use 6 ounces to 5 gallons of water. Since this dosage exceeds 25 parts per million titration iodine, a potable water rinse before reuse is required for any food handling surface in order to comply with Federal Food Additive Regulations 121.2547.

For sanitizing previously-cleaned surfaces, use 1 ounce of Fremont 9933 Disinfectant in 5 gallons of water. At this dosage level, a potable water rinse before reuse is not required since the 25 ppm titratable iodine limit is not exceeded in accordance with the Federal Food Additive Regulation CFR 21, Section 121.2547.

Disinfectant has its own built-in indicator of germicidal activity. When the amber color disappears, a fresh solution should be prepared. Product is not adversely affected by water hardness or low temperatures. Product is Tuberculocidal at a dilution of 3 ounces to 5 gallons water.

**HOSPITALS:** Use as disinfectant recommended above in animal rooms and cages, cafeterias, morgues, laboratories, operating areas, patient rooms, bedframes, walls and floors, thermometers, instruments, rubber gloves, tubing and catheters. Allow at least 10 minutes contact time. Rinse all food-handling surfaces with potable water before reuse. Before disinfecting, instruments should be cleaned to remove all adhering blood and serous exudates.

**COMMERCIAL BUILDINGS, INSTITUTIONS, AND GENERAL HOUSEKEEPING:** Use 3 ounces of Fremont 9933 Disinfectant to 5 gallons of water for cleaning and disinfecting floors, walls, lavatories, shower rooms, refuse containers, kitchen areas, and lunch rooms. Rinse all food-handling equipment with potable water before reuse.

**FOOD PLANTS:** When more than one ounce of Fremont 9933 Disinfectant per 5 gallons of water is used on food contact surfaces, a potable water rinse is required before reuse in accordance with the Federal Food Additive Regulation 121.2547.

# FREMONT 9933 DISINFECTANT

Recommended for cleaning, disinfecting, and sanitizing in hospitals, institutions, food plants, and commercial buildings.

\*ACTIVE INGREDIENTS:

Alpha-(p-Nonylphenyl)-omega-hydroxypoly (oxyethylene)-iodine complex . . . 18.05%

Phosphoric Acid . . . . . 16.00%

INERT INGREDIENT: . . . . . 65.95%

Total . . . 100.00%

\*Provides 1.75% Titratable Iodine.

EPA Establishment No. 7053-MN-1.

EPA Registration No. 7053-21.

U.S. PATENT NOS. 3,028,299 2,977,315

## DANGER

KEEP OUT OF REACH OF CHILDREN. SEE RIGHT PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS AND FIRST AID.

**FOR INDUSTRIAL USE ONLY**

**DANGER**  
CORROSIVE  
in eyes, on  
when handling

**FIRST AID**  
In case of contact  
with eyes, flush  
with water for  
at least 15 minutes.  
Remove clothing  
contaminated with  
liquid. Wash  
egg whites, etc.  
with water.

**NOTE TO USER**  
Probable measures  
against  
need to be  
taken.

**STORAGE AND  
HANDLING**  
Wear all protective  
equipment.  
Return slowly to  
original container  
before discarding.
