

DIRECTIONS

Remove Protective cap. Point spout type nozzle toward nest, crevice or hole where infestation or insects are known to be inside. Press center of valve top all the way down and spray area until saturated with insecticide. Also spray around this area until completely wet with Wasp Spray. This treated surface will have a residual killing action and prevent reinfestation for 2 to 4 weeks. In the event the insecticide film becomes ineffective due to rain or other causes, repeat treatment.

DUE TO THE POWERFUL SPRAYING ACTION OF WASP SPRAY, IT IS NOT RECOMMENDED FOR INDOOR USE IN HOMES, EXCEPT IN ATTIC. IT MAY BE USED IN FACTORIES AND WAREHOUSES, EXCEPT WHERE FOOD AND FEED STUFFS ARE MANUFACTURED OR STORED.

CAUTION: Harmful if swallowed. Avoid inhalation of spray mist, or contact with skin and eyes. In case of contact with skin and eyes, flush with plenty of water; for eyes, get medical attention. Wash hands well with soap and water after use. Prolonged contact with skin can cause toxic symptoms. Do not apply on vegetation. Do not spray on asphalt tile.

WARNING: Flammable! Contents under pressure. Do not puncture. Do not store near heat or open flame. Exposure to temperatures above 130° F. may cause bursting. Never throw container into fire or incinerator.

ACTIVE INGREDIENTS

Pyrethrins	.15%
Piperonyl Butoxide, Technical*	.30%
N-Octyl Bicycloheptene Dicarboximide	.50%
Technical Chlordane**	2.00%
Petroleum Distillate	67.05%

INERT INGREDIENTS 30.00%

*Equivalent to .24% (butylcarbityl) (6-propyl-piperonyl) ether and .06% of related compounds.

**Equivalent to 1.2% Octachloro-4, 7 methano-tetrahydroindane and .8% of related compounds.
