FOR OUTDOOR USE ONLY DIRECTIONS

FOR BEST RESULTS, READ THESE
DIRECTIONS CAREFULLY BEFORE USE.

Remove protective cap. Point spout type nozzle towards nest, crevice or hole where infestation or insects are known to be inside. Press center of valve top all the way down and spray area until saturated with this insecticide. Also spray around this area until completely wet with Wasp Spray. This treated surface will have a residual killing action and prevent reinfestation for 2 to 4 weeks. In the event the insecticide film becomes ineffective due to rain or other causes, repeat treatment. In outdoor use, user should always spray Wasp Spray with the wind at the user's back.
