See Back panel for additional cautions.

**CHEM SPRAY AEROSOLS, INC.  
16210 Farm Road 149  
Houston, Texas 77040**

**DIRECTIONS FOR USE**

Remove cap and press down plastic button with hole away from you. Hold at a convenient distance from the animal, approximately 6 inches, so the spray penetrates to the skin. Work from the back of the animal towards the front of the animal, fluffing the hair may help permit the spray to penetrate. Keep the spray moving constantly. Spray only enough that the hair and skin are slightly damp. Wet ticks with spray. Do not allow spray to get in the eyes or on scrotum.

For cats spray on the basis of a 4 to 6 second application for a 5 pound cat; for dogs spray on the basis of 20 to 30 seconds for application to a 25 pound dog. Repeat treatment if necessary, but it should not be more often than once weekly. Also treat bedding, interior of kennel, and other places where ticks and fleas may be found. The cool sensation caused by the spray, as well as the hissing sound, may temporarily frighten nervous pets. Pets are expected to become accustomed to treatment.

**CAUTION:** Avoid breathing of spray mist. Harmful if swallowed or inhaled. Do not contaminate food or water. Avoid contact with skin. Wash hands after use. Keep out of reach of children. Minimize treatment of eyes and face. Avoid treatment of or exposure to kittens or puppies less than four weeks old. Contents under pressure. Do not store near sources of heat or open flame. Do not throw into fire or incinerator.

**ACTIVE INGREDIENTS:**

Carbaryl (1-naphthyl N-methyl carbamate)	0.5%
Pyrethrins	0.05%
Technical piperonyl butoxide*	0.10%
N-octyl bicycloheptene dicarboximide	0.166%

**INERT INGREDIENTS** 99.184%

\*Consists of 0.08% butylcarbaryl (6-propylpiperonyl) ether and 0.02% related compounds.
