

DIRECTIONS FOR USE

CHEM SPRAY WASP AND HORNET SPRAY combines several effective insecticides into a specially designed package to control wasps and hornets from a distance of 6 to 8 feet.

Remove protective cap. Hold spray container upright, point spout of nozzle toward nest, crevice or hold where insects are and press center of valve top and spray desired area for three to five seconds. This will wet the nest and kill nesting insects. Be sure entire nest and all insects are contacted by spray.

The jet-stream action allows you to stand 6 to 8 feet away from the nest, giving you reasonable safety in killing wasps, hornets, bees, yellow jackets, and spiders.

CAUTION: Do not use indoors. Avoid contact with skin and eyes; if contacted, wash with soap and water; flush eyes with water, consult physician. Avoid breathing of spray mist.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperature above 130° F. may cause bursting. Never throw container into fire or incinerator.

ACTIVE INGREDIENTS:

Malathion (0,0-dimethyl dithiophosphate of diethyl mercaptosuccinate)	0.95%
d-trans Allethrin	0.20%
Technical piperonyl butoxide *	0.40%
N-octyl bicycloheptene d:carboximide	0.40%
Petroleum distillate	8.00%

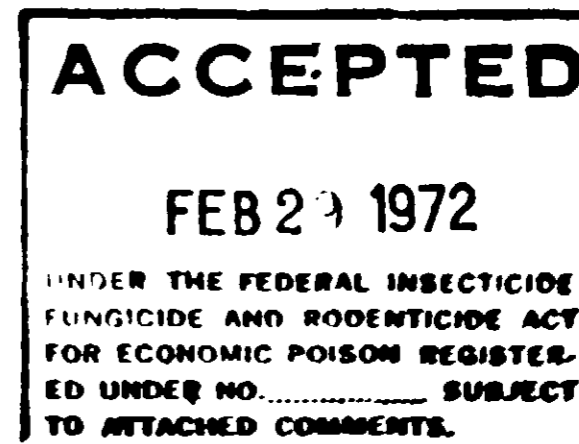

INERT INGREDIENTS 90.05%

*Equivalent to 0.32% (butylcarbityl) (6-propylpiperonyl) ether and 0.08% related compounds.

ENG Reg. No. 7056-50
