DIRECTIONS FOR USE

For use in homes, bakeries, food plants, restaurants, schools, hotels, motels, office buildings, hospitals, and food handling plants.

Remove protective cap. Hold container upright and point valve in desired direction and press button to spray.

FOR HOUSEFLIES, MOSQUITOES, AND GNATS: Close all doors and windows. Point nozzle upward, direct the spray to all parts of the room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

WASPS: Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat as necessary.

FOR CRAWLING INSECTS: Roaches, earwigs, grain mites, sow bugs, spiders, and centipedes spray thoroughly into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, baseboards, and storage areas. Spray directly on insects when possible. Repeat as necessary.

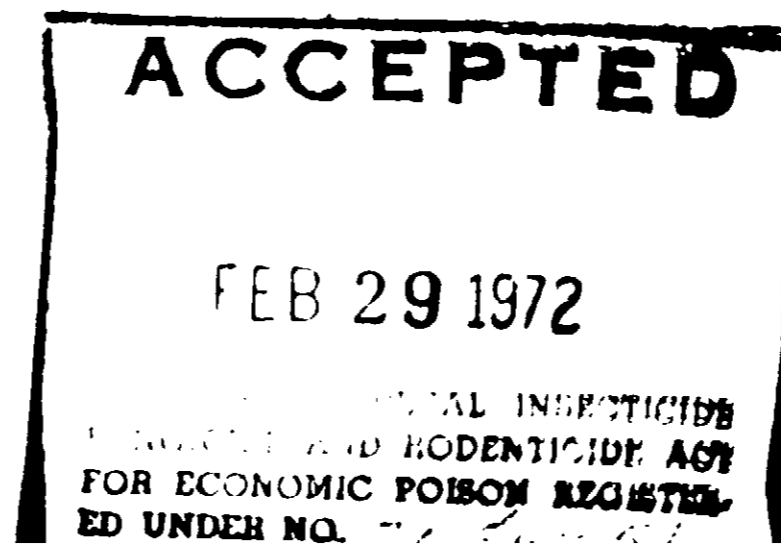

ANTS: Spray trails, nest and point of entry. Spray on ants when possible. Repeat as necessary.

CAUTION: Avoid contamination of food and food stuffs. Food should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation. In hospitals, patients should be removed from room prior to treatment. Room should be ventilated for two hours after spraying. Do not return patients to room until after ventilation. Cover or remove fish bowls. Remove all pets from area to be treated.

WARNING: Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.
