US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (75-767) WASHINGTON, DC 20480  <b>NOTICE OF PESTICIDE:</b> <input type="checkbox"/> REGISTRATION <input type="checkbox"/> REREGISTRATION  (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)	EPA REGISTRATION NO.	DATE OF ISSUANCE
	TERM OF ISSUANCE	
	NAME OF PESTICIDE PRODUCT	

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

[ Faint, illegible text ]

**NOTE:** Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
  - a. Add the phrase "EPA Registration No. 7056-167."
  - b. Under the Precautionary Statements heading, the second paragraph should read:

Do not apply directly to food. Do not use in food areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms, but excluding areas where foods may be prepared or held. In the home, all food

processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

Nonfood areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets, and storage (after canning or bottling.)

- c. Use in food handling establishments can imply use in U.S. Department of Agriculture (USDA) Meat and Poultry Plants. Therefore, either add the statement "Not for Use in USDA Meat and Poultry Plants," or submit an application to USDA requesting use in these areas. If granted, you can then indicate on the label that the product can be used in these areas.
- d. Move "Kennels" to the end of the list of sites in order to avoid "Non-food Areas of Kennels" as a site.
- e. Any products where precautionary labeling appears on other than the front panel must bear the following statement on the front panel:

See Back/Side Panel for Additional  
Precautionary Statements.

- f. Add a street address or P.O. Box Number to the address on the label.
- g. Under the general Directions for Use, delete ". . . from EVERCIDE® Intermediate 2443 . . . ."
- h. Under the Crack and Crevice directions, delete "diluted" from "Apply diluted spray . . . ."
- i. We assume that "equipment capable of delivering a pinstream" (e.g., spray tube attachment) will be sold with the product. Otherwise, please delete this phrase from the label.
- j. Since your data matrix does not give a dielectrical breakdown voltage, you must add the following to the use directions:

Do not use this product in or on electrical equipment due to the possibility of shock hazard.

k. Based on the current Confidential Statement of Formula (CSF) dated June 23, 1988, your product will not meet the label claim for the active ingredient. According to our calculations, the lower limit of the synergist should be 0.259 ( $3.1 \times 8.35 = 2.588$  or 2.59) and not 0.251. Please correct this on both the label and the CSF.

1. Please provide the flashpoint of the product with the propellant on the Confidential Statement of Formula (Block 9), and on the data matrix (Product Chemistry Data Requirement No. 63-15). Mixtures marketed under pressure, including those containing hydrocarbons, are subject in their entirety to tests indicated in 40 CFR 156.10(h)(2)(iii). (Flashpoints are conveniently measured after collecting the liquid expelled from the container in an open cup chilled with dry ice.)

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

George T. LaRocca  
Product Manager (15)

**PRECAUTIONARY STATEMENTS**

**Hazards to Humans and Domestic Animals**

**CAUTION**

May be harmful if swallowed, inhaled or absorbed through skin spray mist and provide adequate ventilation of area being treated with skin, eyes and clothing. In case of contact immediately wash with plenty of water. Wash thoroughly with soap and water if poisoning occurs, get prompt medical aid.

Do not use in commercial food processing preparation, food storage areas. In the home, all food processing surfaces and utensils during treatment, or thoroughly washed before use. Exposed areas should be covered or removed.

Remove pets, birds and cover fish aquariums before spraying. Prevent children or pets to contact treated surfaces until spray has dried.

**Physical or Chemical Hazards**

Contents under pressure. Do not use or store near heat or open flame or incinerate container. Exposure to temperatures above 120°F may cause bursting.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **SHAKE WELL BEFORE USE. KEEP CONTAINER UPRIGHT.**

**General:** Use Residual Spray from EVERCIDE® Intermediate 20 for spot and crevice treatment to control cockroaches, waterbugs, silverfish and other insects listed below. Apply this product only on surfaces and crevice treatment to localized areas where pests are found. Repeat as needed.

**FOR SPOT TREATMENT:**

**To Kill Ants, Cockroaches, Crickets, Silverfish, Spiders, Fleas, and Carpet Beetles:** Spray areas where these pests are found or may hide, include cracks and closets; cracks and crevices in walls; along baseboards behind and beneath sinks, stoves refrigerators, and cabinet plumbing and other utility installations. Pests driven out of hiding should be sprayed directly. For ants, apply to ant trails, also around door frames wherever else these pests may find entrance. Repeat as needed.

**To Kill Brown Dog Ticks and Fleas:** Thoroughly apply as a spot treatment to areas such as pet beds and resting quarters, nearby cracks and crevices, window and door frames and localized areas where these pests may be present. Old bedding should be removed and replaced with fresh bedding after treatment. **Do Not Spray Pets With This Product.**

**FOR CRACK AND CREVICE:**

**To Kill Ants, Cockroaches, Crickets, Silverfish, Sowbugs, Fleas, and Carpet Beetles:** Apply diluted spray in small cracks and crevices. Equipment capable of delivering a pin stream of spray between different elements of construction, between equipment and walls, leading to voids and hollow spaces in walls, equipment legs, and other areas where insects hide.

Caution should be taken to avoid depositing the product onto surfaces. Avoid contamination of surfaces.

**Flies and Mosquitoes:** Use only out of doors as an aid in controlling these insects. Spray outside surfaces of window and door frames where these pests may enter the home. Also spray door frames, resting areas (such as under eaves) or porches, patios and other areas where they may congregate. Flies and mosquitoes coming to rest on treated surfaces. Repeat treatment when necessary.

**STORAGE AND DISPOSAL**

**Storage:** Store in a cool, dry area away from heat and open flame.  
**Disposal:** Replace cap and discard container in a safe manner. Do not incinerate or puncture.
