## INDOOR USE

FLIES, GNATS, MOSQUITOES, FRUIT FLIES, WASPS, HORNETS, BEES, SMALL FLYING MOTHS and other flying insects: Close all doors and windows and direct spray upward into center of room with a slow sweeping motion. Spray 5-10 seconds for average room. Direct spray to all parts of the room, especially windows and other light sources that attract these insects. Keep nozzle in constant motion. Keep room closed for 15 minutes after spraying. Ventilate room thoroughly before re-entry. Sweep up and discard fallen insects. Repeat treatment as necessary but not more than every seven days.

FLEAS AND TICKS: Prior to use, vacuum all infested areas thoroughly and dispose of vacuum bag in outside trash. Apply uniformly to rugs, carpets, draperies and all surfaces of upholstered furniture. Treat under and around furniture if pets frequently rest in these areas. Avoid excessive wetting of upholstered furniture and draperies. A fine spray applied uniformly is all that is necessary to kill fleas. To kill ticks and other labeled insects, apply directly to the pests. Spray thoroughly into hiding places such as cracks and crevices, on walls and floors, along baseboards, window and doorframes. Spray at the rate of one linear foot per second with a slow sweeping motion. Do not allow children or pets to walk on treated surfaces until completely dry. Do not spray on pets or humans. Repeat as necessary but not more than every seven days.

**FLEAS AND TICKS IN PET BEDDING AND PET AREAS:** Remove and destroy or wash pet's old bedding. To reduce infestation, thoroughly spray the animal's bedding, sleeping quarters, around baseboards, window and doorframes, wall cracks, local areas of floors, and other resting places until the surface is slightly moist. Treat these areas at the rate of two seconds per linear foot, holding container at a distance of 12 to 18 inches. Also spray the entire inside surface of doghouses. Repeat as necessary. Put fresh bedding in pet's quarters after spray has dried. Do not allow pets to use treated areas until completely dry. Repeat as necessary but not more than every seven days.

To protect your pet and to minimize reintroduction of fleas from outdoors use EPA registered flea or flea and tick control collars, pet powder, pet spray, pet dip, pet shampoo, flea shampoo or flea and tick shampoo in conjunction with this application and prior to re-entry. Repeat as necessary but not more than every seven days.

**COCKROACHES, ANTS, CRICKETS, CENTIPEDES, FIREBRATS, SPIDERS** and other listed crawling insects: Contact as many insects as possible with the spray in addition to thorough spraying of all parts of the rooms suspected of harboring these pests. Special attention should be paid to hiding places such as beneath sinks, behind and beneath stoves and refrigerators, around garbage cans, cabinets, along the outside of baseboards, door sills, frames and floors, around and on drains, pipes, plumbing, behind bookcases, storage and other utility installation areas, hitting insects with spray whenever possible. **TO KILL ANTS**, treat around doors, window frames and other areas of entry. Spray on ants whenever possible. Repeat as necessary but not more than every seven days.

**CARPET BEETLES:** Directly spray as many insects as possible. Spray all surfaces of upholstered furniture. Where possible, both top and bottom of rugs and carpets should be sprayed thoroughly. Also treat shelves, closets, and areas under furniture, floors, walls, windowsills, baseboards and wherever these insects are seen or suspected. Repeat as necessary but not more than every seven days.

**BEDBUGS:** Spray mattresses lightly, particularly around tufts and seams. Take beds apart and spray in all joints. Treat baseboards, moldings, floors, walls, furniture and other infested areas. Allow treated articles to thoroughly dry before use. Repeat as necessary but not more than every seven days.
