

NEW

**Automatic Machine Disinfecting
Solution Concentrate**

**Designed especially for use in CIDEMATIC[®] A and CIDEMATIC[®] RT
Decontamination Machines**

**Three gallons of concentrated solution and ½ gallon of activator
make 15 gallons of full-strength solution**

**The only EPA-registered solution for both use and re-use in
CIDEMATIC Machines**

Because of dilution caused by re-use, the solution strength is easily
tested with the Two-Minute Effectiveness Test Kit

Each easy-to-handle case contains three 1-gallon containers of
concentrated solution and one ½-gallon container of activator

Requires 75% less storage space than non-concentrated solutions

Added wetting agent provides
thorough rinsing

Fresh wild flower fragrance

Economically priced
