

AMSCO AGRISOLV\* #4

USDA REGISTRATION NO. 7098-5

FOR WEED CONTROL ON IRRIGATION CHANNEL BANKS OR DRY BEDS

ACTIVE INGREDIENTS: 100 Percent Petroleum Distillate.

NET VOLUME GALLONS: (See attached bill of lading.)

COMBUSTIBLE: Avoid storing or using near open flame. Flash point over 200 degrees Fahrenheit ICC Red Label not required.

AMSCO AGRISOLV #4 is an aromatic herbicide. Applied to the banks or dry beds of irrigation channels, it is effective in the control of seedling Johnson grass, sunflower, bramble bush, cottonwood saplings, pole smartweed, cane, crabgrass and winterweed.

RECOMMENDED USAGE:

Apply at the rate of 100 gallons per acre. Do not contaminate irrigation water.

APPLICATION:

Conventional spray equipment such as small hand units or large power driven spray units may be employed. Care should be taken to insure complete coverage and wetting of weeds to be controlled.

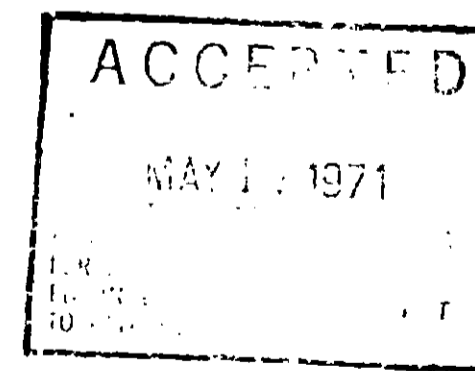

LIABILITY:

Because of soil conditions, methods of application, weed conditions and other factors entirely beyond our control, no responsibility is assumed by AMSCO for failure or damage to plants or crops.

CAUTION:

Volatile. Avoid breathing of vapors or contact with skin. Use only when there is no hazard of drift. Avoid introduction into water supplies or systems. Treated water will kill fish. Keep out of fishbearing waters.

KEEP OUT OF THE REACH OF CHILDREN; harmful if swallowed.
