

### DIRECTIONS

For cleaning and disinfecting against Salmonella choleraesuis and similar gram negative organism on floors, walls, woodwork, and equipment, in public buildings, institutions, and industrial establishments, use 2 oz. per gallon of water. Thoroughly scub all surfaces and rinse with clear water.

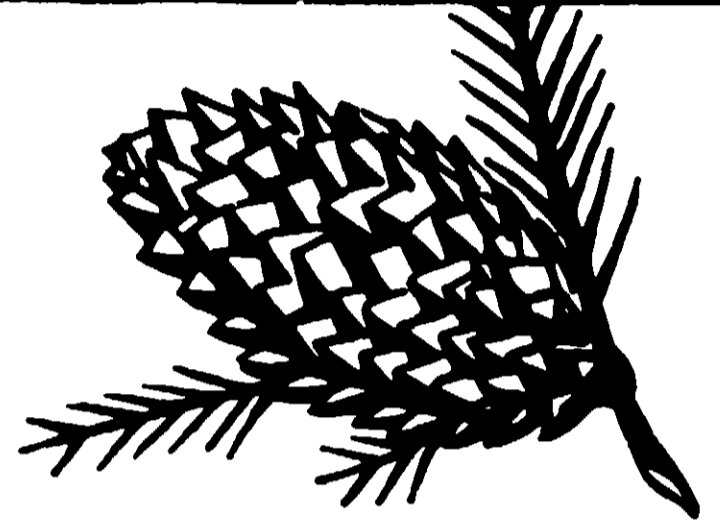

Wherever heavy organic soils are present, or where severe contamination is suspected, use 2 or 3 times normal concentration, scrub well, allow to soak for a few minutes and rinse well.

To deodorize garbage cans and urinals, use 3-4 oz. per gal. of water, apply with sprayer.
