EPA Reg No 7116 5

Sanitize in BLITZ solution using 1 oz. in each 3 gals. of water. This gives an available chlorine content of 100ppm. Dishes, glasses, and utensils should be immersed for a minimum of 2 minutes or for that period of time required by the local sanitary code. The chlorine solution strength should be tested periodically. It should be discarded when the available chlorine content drops below 50ppm.

The article should be placed on a clean drain board for air drying.

warm water.

Let the equipment air dry.
**PROTECT AGAINST DUST
AND DIRT CONTAMINA-
TION.**

Immediately before reusing the equipment, sanitize with Unichem's BLITZ. The solution strength should be 1 oz. for each 3 gals of water. This gives a concentration of 100 ppm. available chlorine. While the solution is being used, it should be checked regularly to maintain a concentration in excess of 50 ppm. available chlorine.

UNICHEM INCORPORATED • GREENVILLE, N. C.

USE DIRECTIONS

DISHES, GLASSES, UTENSILS:

Scrape and or pre flush before washing.

Wash in clean warm water using recommended Uni Chem product

Rinse thoroughly in clean running warm water.

Sanitize in BLITZ solution using 1 oz. in each 2 gals. of water. This gives an available chlorine content of 100ppm. Dishes, glasses, and utensils should be immersed for a minimum of 2 minutes or for that period of time required by the local health agency. This chlorine solution should be tested periodically. It should be used only for the available chlorine content of 100ppm.

The active ingredient is not on a restricted list of pesticides.
