DIRECTIONS

Guardian Mouse Seeds are extremely toxic and **POISON**.
Great Care should be exercised during use.

MOUSE CONTROL IN AND AROUND BUILDINGS

- a) Place teaspoon quantities of bait at 8 to 10 foot intervals where mice feed, water and/or travel.
- b) Place baits in bait boxes constructed of wood or metal, tamper-proof and with baffled entrances.
- c) Remove all other food sources.
- d) Collect and burn or bury all uneaten baits after 72 hours.
- e) Collect and burn or bury dead animals.
- f) Do not treat the same area with strychnine in less than 60-day intervals.

Strychnine baits can cause secondary poisoning. Baits should be placed in areas not accessible to children, pets, wildlife and domestic animals or in tamper-proof bait boxes.

Antidote

If less than 10 minutes has passed since the poison was taken give a tablespoon of salt in a glass of warm water. **CALL A PHYSICIAN IMMEDIATELY.** Sedative treatment should start at once. Intravenous injection of barbituates such as sodium pentobarbital to allay convulsions. Keep the patient warm. Have victim lie down in a quiet, darkened room. Artificial respiration may be needed.
KEEP ALL BAITS NOT IN USE UNDER LOCK AND KEY. DO NOT GIVE AWAY, SELL THESE BAITS.

Container Disposal

Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.
Do not reuse empty drum. Return to drum reconditioner or destroy it by perforating or crushing and burying in a safe place away from water supplies.
Treated bait exposed on soil surface may be hazardous to birds and wildlife. Keep out of lakes, streams or ponds. Do not apply when weather conditions favor drift from areas treated. Dispose of excess treated seeds or wastes by burial. Apply this product only as specified on this label.
