

5-2122-477

DIRECTIONS

Flies, Mosquitoes, Wasps And Gnats: Close doors and windows and spray toward ceiling. Use about 2 ounces of material per 3000 cubic feet of space. Thoroughly treat all surfaces where insects might appear, especially around doors, windows, and lighting fixtures. Return after five minutes and repeat from start. Sweep up fallen insects. Do not remain in treated area. Ventilate the area after treatment is completed.

Moths: Kill moths on contact. Moth infested wooden articles should be treated well. Then sprayed thoroughly, especially around the seams and folds. Moisten thoroughly all of the fabrics or woolen articles for complete mothproofing. Repeated applications may be necessary if garments are not cleaned or washed. Interior surfaces of all storage containers should be sprayed periodically. Repeat every 30 days if articles are not stored in tight containers.

Foaches - Water Bugs - Silverfish - Crickets and Spiders: For control of insects, direct the spray toward and into all places commonly infested by these pests. Spray all cracks, crevices, and breeding places.

Ants: Spray all ant trails, runs and nests. Special attention should be paid to cracks and crevices, also nesting and hiding places.

Bed Bugs: Take bed apart and spray slats, springs and into all cracks. Spray mattress on both sides and into seams and folds. Allow mattress to dry thoroughly before using about 24 hours. Spray around baseboards, corners, behind pictures and any place where insects of this species might hide.

Ticks, Fleas: For complete control of fleas and ticks spray thoroughly under baseboards, floor coverings, and wall cracks as well as sleeping quarters of animals. Spray all around premises where infestation occurs. Do not contaminate food or foodstuffs.

Closet Mites: Spray all surfaces where mites are. Spray around windows and doors. Spray all surfaces where mites might enter.

Clothing: Brush clothing well, especially around seams and folds. Apply to all surfaces of clothing to be protected. Hold roughly 2 feet from clothing and spray thoroughly. Respray if material is rewashed or de-waxed.

Apply to all surfaces 10 days before using. Do not use on silk, wool, fur, or other delicate fabrics.

Upholstered Furniture: Treat all surfaces thoroughly. Pay attention to cracks, crevices, and folds, wells, seams, etc. Spray underside of cushions. For protection of moth, spray all stored furniture thoroughly before storing.

Carpet And Rugs: Apply thoroughly on rug or carpet to be protected. Apply a liberal amount of spray to get penetration well into carpet fibers. Be sure to spray under furniture and around and under baseboards. Spray baseboards and corners. Repeat every 30 days if not stored in tight containers.

Outdoor Use: Will control many insects outdoors. Spray around porches and walk to control mosquitoes, ants, ticks and fleas. Spray around slides, cribs and cinder tables. Can be fogged into the air for temporary relief of gnats and mosquitoes. The above treatment is for temporary relief only. Repeat as necessary.

Directions For Fogging: Fog is stable when used in thermal and mist penetrates and may be used for indoor and outdoor fogging applications. Fog fogs are especially suitable for killing insects such as mosquitoes, etc. on the wing. For killing fleas and larger insects on the wing, wet fogs are more effective. Wet fogs are also usually necessary for applying to areas where deposits of insects are present.
