### DIRECTIONS FOR USE

Dilute with water to the following percentages to be used for the different types of work enumerated below:

**FOR SPACE AND CONTACT SPRAYING:** 1 part Guardian Pyrethrin No. 6603 to 9 parts water.

**TO KILL FLIES, MOSQUITOES AND GNATS:** Close doors and windows, directing the spray up toward the ceiling. The room should be filled with mist and remain closed for 10 to 20 minutes. Sweep up dead insects and burn. Repeat treatment as necessary. The frequent spraying of breeding places also helps.

**TO KILL ROACHES, WATERBUGS AND SILVERFISH:** Spray liberally with force around refrigerators, sinks, all cabinets, around pantry shelves, into all cracks and crevices in moulding and woodwork, pipe openings in walls and floors, or wherever these insects might hide. Repeat as necessary.

**TO KILL ANTS:** Use the spray so as to wet as many insects as possible, paying particular attention to nests or runways. Repeat as necessary.

**TO KILL BEDBUGS:** Bedsteads should be sprayed thoroughly in all corners, cracks and crevices, springs and mattresses should be sprayed thoroughly after the bed has been dismantled, spraying tufts and seams in the mattress. Spray loose mouldings, cracks and crevices where insects hide.

**TO KILL CLOTHES MOTHS AND CARPET BEETLES:** Special care should be given to be sure all cracks and openings below the baseboards are thoroughly wetted with spray. Clothes when aired should be sprayed at a distance of 3 to 4 feet, taking care to see that seams and folds are wetted. Repeat the treatment at least once a month. Closets should be sprayed at least twice a month, directing the spray on to the garments.

DO NOT REMAIN IN TREATED AREAS. VENTILATE THE AREA AFTER TREATMENT IS COMPLETED.

REMOVE PETS, BIRDS, AND COVER FISH AQUARIUMS BEFORE SPRAYING.
