PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT: (First Aid): If swallowed: Promptly drink a large quantity of water. Do not induce vomiting. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the Regional Office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

SPECIAL PRECAUTIONS

PLEASE READ BEFORE OPENING CONTAINER

PREVENTION OF PHYSICAL INJURY

1. This product emits a powerful chlorine gas. Do not open container indoors.
-Hold away from face when opening to avoid breathing fumes.

2. This product is dangerous when not used properly.

**MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION
RELATED COMPLICATIONS MAY LEAD TO DEATH**

Do not mix with any other chemicals

Mixing with other chemicals may cause a violent and instantaneous chemical reaction.

Do not add water to this product

Do not add this product to water in a pool

Do not take advice from others

Do not experiment

Follow label instructions exactly.

PREVENTION OF PROPERTY DAMAGE: Contact between this product in its undissolved state and vinyl liners, painted surfaces or other property in or around the pool will result in permanent bleaching of the color.

Manufactured by KLEEN LEEDS, INC.
55 Jeter Ave.
Sizemore, NJ 07032

Nucleo Quick Dissolving Chlorinating tablets are a fast, safe and convenient method of maintaining a chlorine residual in your swimming pool. Unlike other chemicals of this type, Quick Dissolving tablets are specially formulated to maintain the proper pH of the pool water. These 100% soluble tablets contain stabilized chlorine to provide you with 24 hour continuous chlorine residuals with the convenience of a single premeasured unit of dosage.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Adjust water pH to 7.2 - 7.8. For pools with copper plumbing best pH factor is 7.5-7.8.

2. If the pool has not been previously stabilized with conditioner and stabilizer (cyanuric acid) add correct dosage. Follow the directions for use on the label for that product.

3. Dose using the method below best suited for your particular pool:

INITIAL DOSE: Add three tablets for every 2,000 gallons of pool water. Each tablet weighs 13 grams. This should be sufficient to satisfy demand of raw water in establishing a chlorine residual. If there is no chlorine residual on the following day, repeat dosage until chlorine residual of 1 ppm-1.5ppm is found 24 hours later prior to any additional dosages. Test water frequently with a reliable test kit.

MAINTENANCE DOSE: Thereafter, add one tablet per 2,000 gallons daily or as needed to maintain a minimum chlorine residual of 1.0 ppm to 1.5 ppm as determined by a test kit. During heat waves or periods of heavy bathing load, more tablets will be required per day to maintain chlorine residual. Also check pH to keep in proper range, as pH has a direct effect on chlorine action.

NOTE: These tablets reduce the need for addition of chemicals to adjust pH, but pH should be brought back into range if it falls or climbs due to rain, makeup water, wind blown dust, or any other reason.

Application should be made using one of the following methods:

PLASTIC CHLORINATOR: An appropriate floating chlorinator is one that is designed for quick dissolving tablets. Follow the manufacturer's directions for use.

SKIMMER METHOD: Empty skimmer of all chemicals and/or debris. Make sure the filter is on and that water is properly recirculating through skimmer. Remove any chemicals that may be in an in-line automatic chemical dispensing device. Place tablets in skimmer, they will dissolve in approximately 15 minutes.

POOL GALLON CALCULATOR (all dimensions in feet)

Square or Rectangular: Length x Width x Average Depth x 7.5 = Gallons

Round or Oval: Length x Width x Average Depth x 5.9 = Gallons

STORAGE AND DISPOSAL: Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.
