PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wear contaminated clothing before reusing.

PRACTICAL TREATMENT: (First Aid): If swallowed: Promptly drink a large quantity of water. Do not induce vomiting. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public water systems in accordance with applicable permits. For guidance contact the Regional Office of EPA. **PHYSICAL AND CHEMICAL HAZARDS:** Strongly irritant. May cause a violent reaction leading to fire or explosion. Combustible with moisture. Organic matter or other chemicals may start a chemical reaction with generation of heat. Storage in humid areas, and possible penetration of air and moisture.

SPECIAL PRECAUTIONS:

PLEASE READ BEFORE OPENING CONTAINER

PREVENTION OF PHYSICAL INJURY:

1. This product is a powerful irritant. Do not open container indoors.
2. This product is dangerous when not used properly. MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION.

BEFORE CONTAINER IS OPENED:

DO NOT GET IN EYES, ON SKIN, OR ON CLOTHING

Mixing with other chemicals and use in swimming pools and hot tubs may cause a violent reaction leading to fire or explosion.

These Slow Dissolving Chlorine most concentrated form of dry chlorine in size and contain cyanuric acid which protect chlorine from affecting chlorine achieve proper chlorine residual maintain beautiful, clean sparkling use in off-line, flow-through, or the manufacturer's directions device.

DIRECTIONS:

1. It is a violation of federal law to use without its labeling.
 2. Adjust water pH to 7.2-7.8.
 3. Adjust chlorine level to 1.0 ppm.
 4. If the pool has not been properly balanced (cyanuric acid), follow that product's directions.
 5. Fill chlorinator with tablets. Fill upon the volume of water flowing residual in pool above 1.0 ppm.
 6. Adjust valves on chlorinator for proper flow. Keep chlorine level above or decreasing flow.
- PLEASE NOTE:** The pH of these tablets the pH and alkalinity maintained at 7.2-7.8 on distribution of sodium carbonate or soda ash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT (First Aid): If swallowed: Promptly drink a large quantity of water. Do not induce vomiting. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the Regional Office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

SPECIAL PRECAUTIONS

PLEASE READ BEFORE OPENING CONTAINER

PREVENTION OF PHYSICAL INJURY

1. This product emits a powerful chlorine gas. Do not open container indoors.

Hold away from face when opening to avoid breathing fumes.

2. This product is dangerous when not used properly.

MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION.

RELATED COMPLICATIONS MAY LEAD TO DEATH

Do not mix with any other chemicals

Mixing with other chemicals may cause a violent and instantaneous chemical reaction.

Do not add water to this product

Do not add this product to water in a pool

Do not take advice from others

Do not experiment

Follow label instructions exactly

PREVENTION OF PROPERTY DAMAGE: Contact between this product in its undissolved state and vinyl liners, painted surfaces or other property in or around the pool will result in permanent bleaching of the color.

Manufactured for

ALCOA CHEMICALS, INC.
55 Jackson Ave. So. Birmingham, AL 35202

These Slow Dissolving Chlorinating Tablets are manufactured with the most concentrated form of dry chlorine available today. They are consistent in size and contain cyanuric acid - a stabilizer that prevents ultra violet light from affecting chlorine in the pool. These Tablets allow you to achieve proper chlorine residuals with a minimum of effort and easily maintain beautiful, clean sparkling water. These tablets are designed for use in off-line, flow-through, soaker-type chlorinating devices. Follow the manufacturer's directions for use supplied with your particular device.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Adjust water pH to 7.2 - 7.6 as determined by a test kit. For pools with copper plumbing best pH factor is 7.5 - 7.6.

2. If the pool has not been previously stabilized add Conditioner and Stabilizer (cyanuric acid). Follow the directions for use on the label for that product.

3. Fill chlorinator with tablets. The rate of solution of the tablets depends upon the volume of water flowing through the chlorinator. Keep chlorine residual in pool above 1 p.p.m. at all times.

4. Adjust valves on chlorinator so that water flow can be observed passing through. Keep chlorine residuals between 1 and 2 p.p.m. by increasing or decreasing flow with proper valve settings.

PLEASE NOTE: The pH of these tablets is on the acid side and will tend to reduce the pH and alkalinity of the pool water. Proper pH should be maintained at 7.2-7.6 as determined by a test kit through periodic additions of sodium carbonate or sodium hydrogen carbonate.

POOL GALLON CALCULATOR (all dimensions in feet)

Square or Rectangular

Length x Width x Average Depth x 7.5 = Gallons

Round or Oval

Length x Width x Average Depth x 5.9 = Gallons

STORAGE AND DISPOSAL: Keep product in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible, and flood with large amounts of water. Do not remove liquid from container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.
