1 of 1

ACCEPTED

MAY 10 1994

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 7124-17

✓ Standard strength

✓ Kills common species

✓ Prevents algae from growing

✓ 1 qt per 50,000 gallons

PRECAUTIONARY STATEMENTS

HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Keep out of reach of children. Corrosive, causes severe eye and skin damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food. Rinse empty container thoroughly with water and discard it.

STATEMENT OF PRACTICAL TREATMENT: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly large quantity egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

When this product is used as directed, it will control and inhibit the development of *Chlorella Pyrenoidosa* (Green), *Phormidium limbatum* (Black algae), *Phormidium Retzi* (Square D Algae), *Lyngbya Vesiculosa* (Blue-Green) and other swimming pool algae. This product is compatible with most commonly used swimming pool chemicals, but should not be mixed with soap and other cleaners or premixed with other water-treating chemicals. This product works best when added by itself to pool water.

INITIAL DOSE: 1 gallon of this product to 50,000 gallons of water.

MAINTENANCE DOSE: 1 quart of this product to 50,000 gallons of water. Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, the initial dose should be repeated within

48 hours after algae debris is removed from the pool. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at least once every 7 days. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If makeup water is added at the rate of more than 10% per week of pool capacity, add 1 quart of this product for each 10,000 gallons of fresh makeup water added per week.

When swimming season is over, add 1 gallon of this product to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

STORAGE AND DISPOSAL

STORAGE: Keep container closed when not in use. Leaking or damaged containers should be placed in a plastic bag and discarded in trash. Map up spills with clean water. All pesticides should be kept out of reach of children and stored away from food.

DISPOSAL: Do not reuse empty container. Rinse thoroughly. Securely wrap in several layers of newspaper and discard in trash.
