

ATTACKS AND DESTROYS ALGAE
ON POOL SIDES AND FLOORS.

[illegible]

NOV 2 - 1970

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
FOR ECONOMIC POISON REGISTE
ED UNDER NO. 7124-24

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971).

2. Use 8.8 pounds of 100% available chlorine per 1000 gallons of water per acre and 1.5 pounds of water per acre for 1 reach rate pump for 10 hours. Sprinkle 2 to 4.8 lbs. dry, the walls where algae is present and on the bottom of the water where algae is seen on pond bottom. 1 lb. will kill through the water and kill the algae on a matter of hours. In severe cases use 2 pounds per 1000 gallons of water. If algae is not severe, use 1 pound per 1000 gallons of water. Sprinkle lightly on scattered patches of algae. Do not use pool tub chlorine residual falls below 1.0 ppm. Do not use in water. Destroy when empty. Do not discharge effluent into lake or stream or pond.

WARNING

Under certain conditions, the product, because of its potency, may remove color from vinyl lined and painted pools. Discoloration can be prevented by brushing the granules lightly with a pool brush after they settle to the floor of the pool. The brushing is for the movement of the granules distributing the strength and not for the effect of wetting and abrading the pool surface which is caused by brushing. After brushing, the pool is left to dry for 24 hours before use. The pool is then covered with a pool cover. The pool cover should be removed and the pool cleaned every 7 days. The pool is then covered with the pool cover. The pool is then covered with the pool cover.

POISON

[illegible]
$$\begin{aligned} (D_1 + 2D_2 + D_3)u &= 2\lambda_1 u + 2\lambda_2 u + 2\lambda_3 u + 2\lambda_4 u + 2\lambda_5 u + 2\lambda_6 u + 2\lambda_7 u + 2\lambda_8 u + 2\lambda_9 u + 2\lambda_{10} u \\ &= 2(\lambda_1 + \lambda_2 + \lambda_3 + \lambda_4 + \lambda_5 + \lambda_6 + \lambda_7 + \lambda_8 + \lambda_9 + \lambda_{10})u. \end{aligned}$$
