

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT: (First Aid: If swallowed: Promptly drink a large quantity of water. Do not induce vomiting. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the Regional Office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

**SPECIAL PRECAUTIONS
PLEASE READ BEFORE OPENING CONTAINER**

PREVENTION OF PHYSICAL INJURY

1. This product emits a powerful chlorine gas. Do not open container indoors.
2. This product is dangerous when not used properly.

**MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION
RELATED COMPLICATIONS MAY LEAD TO DEATH**

- Do not mix with any other chemicals
- Mixing with other chemicals may cause a violent and instantaneous chemical reaction.
- Do not add water to this product
- Do not add this product to water in a pool
- Do not take advice from others
- Do not experiment
- Follow label instructions exactly.

PREVENTION OF PROPERTY DAMAGE: Contact between this product in its undissolved state and vinyl liners, painted surfaces or other property in or around the pool will result in permanent bleaching of the color.

Manufactured for
ALDEN LEUNG, INC.
55 Jonathan Ave.
So. Kearny, NJ 07082

Dissolves Quickly & Completely • Holds Available Chlorine Longer

ACTIVE INGREDIENT:
Trichloro-s-triazinetrione* 99.0%
Inert Ingredient 1.0%
*Provides 89% Available Chlorine

**KEEP OUT OF REACH OF CHILDREN
DANGER

NET WEIGHT 40 LBS.

Desert Granules are the most highly concentrated stabilized cyanuric based disinfectant developed to establish an initial chlorine residual through superchlorination and maintain proper levels of available chlorine through normal daily maintenance. Desert Granules are easy to dispense and 100% soluble.

DIRECTIONS FOR USE

It is in violation of federal law to use this product in a manner inconsistent with its labeling.
INITIAL DOSAGE: When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish an available chlorine residual of 1.0 to 1.5 ppm. Add 1 to 1-1/2 ounces of this product per 1,000 gallons which will provide 8.7-10 ppm available chlorine. Test with a reliable chlorohal test kit. The next morning add Conditioner and Stabilizer (cyanuric acid) to stabilize the pool, according to the directions on that label. Bathers should not be allowed to enter the pool until the chlorine residual has dropped to 3 ppm or less.

MAINTENANCE DOSE: Add 1/4 to 1/2 ounce per 1,000 gallons per day to maintain a chlorine residual at all times of 1.0 to 1.5 ppm, as determined by a suitable test kit. pH should be maintained in the range of 7.2-7.6.

SHOCK TREATMENT: A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. Add 1-1/2 ounces per 1,000 gallons. Bathers should not be permitted to enter the pool until chlorine residual has dropped to 3 ppm or less.

Note that daily dosages should vary to compensate for heavy accumulations of dust and dirt caused by storms or heavy bather loads. Additional dosages may be required to maintain a chlorine residual of 1.0-1.5 ppm.

Application should be made using one of the following methods:

SKIMMER METHOD: Use this method to avoid bleaching vinyl liner or paint. Empty skimmer of all chemicals and debris. Make sure that filter is on and that water is properly recirculating through skimmer. Remove any chemicals that may be in an in-line automatic chemical dispensing device. Pour Desert Granules slowly into skimmer, making sure that the material is drawn into the system at the same rate; do not allow the material to accumulate as gases generated may cause an explosion.

DOSE DIRECTLY INTO POOL: Broadcast dosage across surface of water. To prevent liner damage, use skimmer method above.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible, and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.
