OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

Mark Visconti, General Manager
Alden Leeds, Inc.
55 Jacobus Avenue, South
Kearny, NJ 07032

Subject: Label Amendment
Nuclo Concentrated Pool Chlorinating Granules
EPA Registration Number: 7124-31
Application Date: December 15, 2011
Application Receipt: December 22, 2011

Dear Mr. Visconti:

This acknowledges receipt of the following amendment submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

Proposed Amendment:

Label revision to update the product label to include previously approved claims that were inadvertently omitted from the most recent stamped accepted label.

A new stamped accepted label is requested.

General Comments:

Based on a review of the submitted materials your amendment, to update your product label to include previously approved claims that were inadvertently omitted from your most recently stamped approved product label, is acceptable.

A stamped accepted label is enclosed for your files.

If you have any questions or comments concerning this letter, please contact Killian Swift via email at swift.killian@epa.gov or by telephone at (703) 308-6346 during the hours of 5:00 AM to 12:00 PM EST. When you submitting information or data in response to this letter, send a copy of this letter to accompany the submission in order to facilitate processing.

Sincerely,

Monisha Harris
Product Manager 32
Regulatory Management Branch II
Antimicrobials Division (7510P)

Enclosure: EPA stamped accepted label.

m-clo[®]

**Concentrated
Pool Chlorinating
GRANULES**

ACTIVE INGREDIENT:
Sodium Dichloro-s-Triazinetrione Dihydrate 99.0%
OTHER INGREDIENTS: 1.0%
TOTAL: 100.0%
* Provides 56% Available Chlorine

Stabilized Dichlor granular

Fast dissolving

**For daily chlorination
of swimming pools**

KEEP OUT OF REACH OF CHILDREN

DANGER

SEE FIRST AID STATEMENT AND OTHER PRECAUTIONS ON BACK PANEL BEFORE OPENING CONTAINER

NET WT. 10 LBS. (4.54 kg)

ACCEPTED

JAN -5 2012

Under the Federal Insecticide, Fungicide, and
Rodenticide Act as amended, for the
pesticide, registered under
EPA Reg. No. 7124-31

100% Soluble • UV stabilized • 24-hour chlorine residual • Fast-dissolving

1/4 to 1/2 ounce per 1,000 gallons daily • Kills algae

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may

SHOCK TREATMENT

A shock treatment should be maintained every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 2 oz. of this product per 1,000 gallons of pool water. Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 and 1.5 ppm. Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine.

WINTER USE

Adjust pH to 7.2-7.6. Introduce this winter shock at the rate of 1 lb. per 7,500 gallons of water. This product rapidly provides the elevated levels of available chlorine necessary for winterizing. Superchlorination disinfects the water and kills bacteria and algae to prevent their multiplication during the winter when the filter is shut off and the pool is covered.

Application should be made using one of the following methods:

SKIMMER METHOD: Use this method to avoid bleaching vinyl liner or paint. Empty skimmer of all chemicals and/or debris. Make sure that filter is on and properly recirculating through skimmer. Remove any chemicals that may be in an in-line automatic chemical dispensing device. Pour this product slowly into skimmer, making sure that the material is drawn into the system at the same rate: do not allow this material to accumulate as gases generated may cause an explosion.

DOSE DIRECTLY INTO POOL: Broadcast across surface of water. To prevent liner damage, use skimmer method above.

This product is a highly concentrated stabilized disinfectant developed to establish an initial chlorine residual through superchlorination and to maintain proper levels of available chlorine through normal daily maintenance. This product is quick dissolving, easy to dispense and 100% soluble.

DIRECTIONS FOR USE IN SPA CARE

When starting up a new spa superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. Add 1 oz. of this product per 500 gallons of water. Test with a reliable chlorine test kit. Reentry into treated spas is prohibited above levels of 3 ppm of chlorine. The next morning add Conditioner and Stabilizer (cyanuric acid), according to

the directions on the label, to stabilize the spa.

SHOCK TREATMENT: A shock treatment should be made every week by adding 1 oz. of this product per 500 gallons of water. Reentry into treated spas is prohibited above levels of 3 ppm of chlorine. Keep in mind that a slight flexibility must be maintained in the event of super heavy-bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 ppm and 1.5 ppm.

DAILY CHLORINATION: This product should be added daily or as needed at the rate of 1/8 to 1/4 oz. per 500 gallons of spa water to maintain a chlorine residual at all times of 1.0 ppm to 1.5 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.

DOSE DIRECTLY INTO SPA: Proper dosage should be broadcast directly into circulating spa water. Apply dosage directly to spa water. Do not mix in a pail.

CONVERTING OUNCES TO TABLESPOONS/TEASPOONS
1 ounce = 3 tablespoons
1 ounce = 9 teaspoons

POOL GALLON CALCULATOR (all dimensions in feet)

Square or Rectangular:

Length x Width x Average Depth x 7.5 = Gallons

Round or Oval:

Length x Width x Average Depth x 5.9 = Gallons

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container, tightly closed away from heat or open flame. Store in a cool, dry, well ventilated place. Keep container off wet floors.

PESTICIDE DISPOSAL: Do not put spilled product, filled or partially filled containers in the trash. In case of decomposition, isolate container in open area if possible and flood with large amounts of water. Dispose of waste material according to label use directions otherwise call 1-800-CLEANUP for guidance from your local solid waste agency.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available, or discard in trash.
